This agreement is made by and between the above named developer (herein "Developer") and Boone County, Missouri, a political subdivision of the State of Missouri, through its Resource Management Department, (herein "County") and shall be effective on the above date when signed and approved by all persons listed below.

In consideration of the performance based by each party of their respective obligations described in this agreement, the parties agree to the following:

- 1. Background and Purpose of Agreement** – The Developer is the owner or authorized agent of the owner for the real estate contained within the development described above which is subject to the Boone County Stormwater Regulations. This agreement is made pursuant to Section 8.4 Performance and Guarantee, in the Stormwater Regulations of Boone County, Missouri in order to permit the Developer to disturb land on the development described above, and to assure County of the required erosion and sediment control and stormwater management. By entering into this agreement the developer is agreeing to comply with the erosion and sediment plan described below in accordance with the County Stormwater Regulations and specifications and provide to County financial security in the event the developer fails to comply with the plan, or complete the improvements within the time and manner provided for by this agreement.
- 2. Description of Improvements** – The Developer agrees to adhere to the Stormwater Pollution Prevention Plan (SWPPP) and Erosion and Sediment Control (ESC) Plans for Construction activities at FairCom East Driveway Improvements 6300 West Sugar Creek Road. The SWPPP and ESC was prepared by Engineering Surveys & Services on March 24, 2014.
- 3. Time for Completion** – The Developer agrees to complete the land disturbance activities and stabilize the site as described in the SWPPP no later than the 24th day of March, 2016, and all such improvements shall pass County inspection as of this date.
- 4. Security for Performance** – To secure the Developer's performance of its obligations under this agreement, Developer hereby agrees to provide the County with security in the amount of \$20,990.25, which County may use and apply for Completion of the above described improvements in the event the Developer fails to complete the above described improvements within the time or within manner required by County under its regulations.

The Security shall be provided to County as a condition precedent to the effectiveness of this agreement in the following form:

- Certificate of Deposit issued by FDIC insured bank for a term of XX months.
- Corporate surety bond issued to Boone County, Missouri

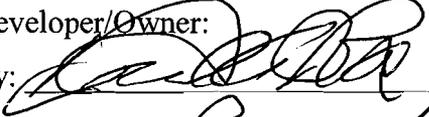

5. **Use of Security** – The Developer hereby authorizes County to use, redeem, or otherwise obtain payment as applicable, from the security described above for purposes of completing improvements required of the Developer under this agreement in the event that such improvements are not completed within the time provided for by this agreement, or any extension thereof granted by County in its discretion, or in the event such improvements are not completed in accordance with regulatory requirements or specifications imposed by County. Developer authorizes County to cash the Cash Deposit contemplated herein upon written instructions from the duly-elected and serving Treasurer of Boone County without further authorization or signature required by Developer. In the event Developer fulfills its obligations in the time and manner required by this agreement and obtains a satisfactory final inspection from the County prior to March 24, 2016, then County shall provide Developer with written proof that the requirements of this Security Agreement are satisfied and the Cash Deposit can be released to Developer. If no written proof has been provided to the financial institution issuing the Cash Deposit that Developer has complied with the requirements of this Agreement, however, then the financial institution shall, on March 24, 2016, or such extended period as mutually-agreed by the parties in writing, shall immediately transfer the balance of the Cash Deposit to the account then-designated by the Boone County Treasurer. If the total sum of the Cash Deposit is not used for completion of any necessary permit items, then the remaining balance shall be paid to Developer within thirty (30) days of completion and acceptance of any required work, along with an itemization of charges detailing the expenditures made by the County.
6. **Additional Sums Due** – In the event that the security provided herein is insufficient to complete the required improvements as determined by the County, Developer will, upon demand by the County accompanied by a detailed itemization of the requested additional sum, deposit with County such additional monies which, in the opinion of the County, will be required to complete the necessary improvements. In the event that Developer does not deposit the additional monies with the County within ten (10) days, the Developer shall be deemed in default of this Agreement.
7. **Remedies Cumulative** – Exercise or waiver by the County of any enforcement action under this Agreement does not waive or foreclose any other or subsequent enforcement action whatsoever. The County shall be entitled to its costs, including reasonable attorneys' fees, in enforcement of Developer's obligations under this Agreement.

8. **Authority of Representative Signatories** – Signatories to this agreement who execute this agreement in a representative capacity for a corporation, limited liability company or partnership, or other business entity, hereby affirmatively represent that they have obtained all resolutions or orders needed to enter in this agreement and are duly authorized to enter into this agreement and bind the parties which they represent to all terms and conditions herein.
9. **Binding Effect** – This agreement shall be binding upon the parties hereto in their respective heirs, personal representative, administrators, successors and interest in successors in assigned offices. The County and Developer hereby accept this Agreement as a lawful and satisfactory Security Agreement.

In Witness Whereof the Developer and the County have executed this agreement to be effective on the day and year first above written.

Project Plans and/or Details

It is understood and agreed that, except as may be otherwise provided for by the "General Specifications, and "Technical Specifications," and "Special Provisions" the work shall be done in accordance with the "Missouri Standard Specifications for Highway Construction, 2011", a copy of which can be obtained from the State of Missouri, Missouri Highway and Transportation Division in Jefferson City, Missouri. Said Specifications are part and parcel of this contract, and are incorporated in this contract as fully and effectively as if set forth in detail herein.

The Contractor further agrees that he is fully informed regarding all of the conditions affecting the work to be done, and labor and materials to be furnished for the completion of this contract, and that his information was secured by personal investigation and research and not from any estimates of the Owner; and that he will make no claim against the Owner by reason of estimates, tests, or representation of any officer, agent, or employees of the Owner.

The said Contractor agrees further to begin work not later than the authorized date in the Notice to Proceed, and to complete the work within the time specified in the contract documents or such additional time as may be allowed by the Engineer under the contract.

The work shall be done to complete satisfaction of the Owner and, in the case the Federal Government or any agency thereof is participating in the payment of the cost of construction of the work, the work shall also be subject to inspection and approval at all times by the proper agent or officials of such government agency.

The parties hereto agree that this contract in all things shall be governed by the laws of the State of Missouri.

Contractor agrees it will pay not less than the prevailing hourly rate of wages to all workers performing work under the contract in accordance with the prevailing wage determination issued by the Division of Labor Standards of the Department of Labor and Industrial Relations for the State of Missouri and as maintained on file with the Boone County Resource Management Department.

The Contractor further agrees that it shall forfeit as a penalty to the County of Boone the sum of \$100.00 for each worker employed for each calendar day or portion thereof such worker is paid less than the stipulated rates set forth in the prevailing wage determination for the project for any work done under this contract by the Contractor or by any Subcontractor employed by the Contractor pursuant to the provisions of Section 290.250 RSMo. The Contractor further agrees that it will abide by all provisions of the prevailing wage law as set forth in Chapter 290 RSMo. and rules and regulations issued thereunder and that any penalties assessed may be withheld from sums due to the Contractor by the Owner.

The contractor agrees that he will comply with all federal, state, and local laws and regulations and ordinances and that he/she will comply and cause each of his/her subcontractors, and directives pertaining to nondiscrimination against any person on the grounds of race, color, religion, creed, sex, age, ancestry, or national origin in connection with this contract, including procurement of materials and lease of equipment; therefore, in accordance with the special provisions on that subject attached hereto, incorporated in and made a part of the Contract.

The Contractor expressly warrants that he/she has employed no third person to solicit or obtain this contract in his behalf, or to cause or procure the same to be obtained upon compensation in any way contingent, in whole or in part, upon such procurement; and that he has not paid, or promised or agreed to pay to any third person, in consideration of such procurement, or in compensation for services in connection therewith, any brokerage, commission or percentage upon the amount receivable by him hereunder; and that he has not, in

3 17-2014

estimating the contract price demand by him, included any sum by reason of such brokerage, commission, or percentage; and that all moneys payable to him hereunder are free from obligation of any other person for services rendered, or supposed to have been rendered, in the procurement of this contract. He further agrees that any breach of this warranty shall constitute adequate cause for the annulment of this contract by the Owner, and that the Owner may retain to its own use from any sums due to or to become due hereunder an amount equal to any brokerage, commission, or percentage so paid, or agreed to be paid.

The Contractor is aware of the provisions of the Overhead Power Line Safety Act, 319.075 to 319.090 RSMo, and agrees to comply with the provisions thereof. Contractor understands that is their duty to notify any utility operating high voltage overhead lines and make appropriate arrangements with said utility if the performance of contract would cause any activity within ten feet of any high voltage overhead line. To the fullest extent permitted by law, Contractor shall indemnify, hold harmless and defend the County, its directors, officers, agents, and employees from and against all claims, damages, losses and expenses (including but not limited to attorney's fees) arising by reason of any act or failure to act, negligent or otherwise, of Contractor, of any subcontractor (meaning anyone, including but not limited to consultants having a contract with contractor or a subcontract for part of the services), of anyone directly or indirectly employed by contractor or by any subcontractor, or of anyone for whose acts the contractor or its subcontractor may be liable, in connection with any claims arising under the Overhead Power Line Safety Act. Contractor expressly waives any action for Contribution against the County on behalf of the Contractor, any subcontractor (meaning anyone, including but not limited to consultants having a contract with contractor or a subcontract for part of the services), anyone directly or indirectly employed by contractor or by any subcontractor, or of anyone for whose acts the contractor or its subcontractor may be liable, and agrees to provide a copy of this waiver to any party affected by this provision.

BID RESPONSE

TO: COUNTY OF BOONE, MISSOURI

SUBJECT: ANGEL LANE PAVEMENT RECONSTRUCTION

Project No.: 25-22 MAY 14

THE UNDERSIGNED BIDDER, having examined all specifications, and other proposed contract documents, and all addenda thereto; and being acquainted with and fully understanding (a) the extent and character of the work covered by this proposal; (b) the location, arrangement, and specified requirements of the proposed work; (c) local conditions relative to labor, transportation, hauling, and delivery facilities; and (d) all other factors and conditions affecting or which may be affected by the work.

HEREBY PROPOSES to furnish all required materials, supplies, equipment, tools, and plant; to perform all necessary labor and supervision; and to install, erect, equip, and complete all work stipulated in, required by, and in accordance with the proposed contract documents, specifications, and other documents referred to herein (as altered, amended, or modified by all addenda hereto) for and in consideration of the prices stated herein. All prices stated herein are firm and include Missouri Sales and Use Tax and all other taxes which might be lawfully assessed against or in connection with the work proposed herein.

SECTION I

THE UNDERSIGNED BIDDER UNDERSTANDS that the specifications, contract, and bond governing the construction of the work contemplated are those known and designated as the **Boone County Roadway Regulations Chapter II, MoDOT Standard Specifications, Rules of Missouri Department of Natural Resources, Division 20-Clean Water Commission (10CSR20)**, together with the "General Specifications", "Technical Specifications", and "Special Provisions", if any, attached to this proposal.

THE UNDERSIGNED BIDDER UNDERSTANDS that the quantities given in the following itemized proposal are not guaranteed by the Owner, but are used for the purpose of comparing bids and awarding the Contract, and may or may not represent the actual quantities encountered on the job; and that the sum of the products of the quantities listed in the following itemized proposal, multiplied by the unit price bid shall all constitute the gross sum bid.

THE UNDERSIGNED BIDDER submits the following itemized proposal and hereby authorizes the Engineer to correct any multiplication of "Unit Price" by "Quantity" as shown under "Extended Total". If there is a discrepancy between the "Unit Price" and the "Extended Total" the "Unit Price" shall govern.

SECTION II

I hereby agree to complete the work herein specified before the **Contract Time** specified in the Notice to Bidders and agree that the County will sustain substantial damages, the amount of which is impossible to determine at this time, if work is not completed by the completion date. Time is an essential feature of this Contract. I agree that if I fail to finally and fully complete the work within the time allowed I will be in breach of the Agreement which shall entitle the County to collect **liquidated damages** from the Bidder and/or the Bidder's Surety in the amount specified under liquidated damages in the Notice to Bidders for each day that completion is delayed beyond the specified completion date. I further authorize said damages to be reduced from any final payment on the Project.

SECTION III

Acknowledgment of receipt of any and all Addenda, if applicable, shall be included with the bid documents at the time of the submittal to Boone County for consideration.

SECTION IV

The undersigned agrees and understands that the County has the right to reject any and all bids, to waive informalities or other requirements for its benefit, and to accept such proposal as it deems to its best interest.

SECTION V

If this proposal is accepted, the undersigned hereby agrees that work will begin no later than the date specified in the Notice to Proceed and will be diligently prosecuted at such a rate and in such manner as is necessary for the completion of the work herein specified before the completion date.

The Contractor further agrees that, should he fail to complete work in the time specified or such additional time as may be allowed by the Owner under this Contract, the amount of liquidated damages to be recovered on this project shall be in accordance with Section II of the Bid Response.

Accompanying this proposal is a certified check, treasurer's check or cashier's check, or a bidder's bond payable to the Owner for five percent of AMOUNT OF BID. If this proposal is accepted and the undersigned fails to execute the Contract and furnish a contract bond as required, then the proposal guaranty shall be forfeited to the Owner.

Compensation to the Contractor will be calculated as an addition to or deduction from the Contract price, based upon such written terms as may be established by the owner, either (a) by an acceptable lump sum proposal of the Contractor, (b) on a cost-plus limited basis not to exceed a specified limit, or (c) on basis of bid or mutually agreed upon unit prices. Contractor shall not employ any Subcontractor, Supplier, or other person or organization (including those acceptable to Owner and Engineer as indicated below), whether initially or as a substitute, against whom Owner or Engineer may have reasonable objection. Contractor shall not be required to employ any Subcontractor, Supplier, or other person or organization to furnish or perform any of the Work against whom the Contractor has a reasonable objection.

No acceptance by Owner or Engineer of any such Subcontractor, Supplier, or other person or organization shall constitute a waiver of any right of Owner or Engineer to reject defective Work.

Said Specifications are part and parcel of this Contract and are incorporated in this Contract as fully and effectively as if set forth in detail herein.

When an item is the subject of both the **Boone County Roadway Regulations Chapter II** and the **MoDOT Standard Specifications**, the **Boone County Roadway Regulations Chapter II** will govern the work.

SECTION 1. - DEFINITIONS

The following changes shall be made to Section 101. Definitions. and shall apply each time they occur in the "Missouri Standard Specifications for Highway Construction Current Edition" hereinafter the **MoDOT Standard Specifications**.

- A. **Owner:** Shall mean the County of Boone as contracting agency acting by and through any of its authorized representatives.
- B. **Commission:** Shall mean the Boone County Commission.
- C. **Engineer:** Shall mean the Director of the Boone County Resource Management Department acting by and through any of his authorized representatives.

SECTION 2. - PROPOSAL REQUIREMENTS AND CONDITIONS

2.1 Interpretation of Proposed Quantities. The quantities appearing in the bid schedule are prepared for the comparison of bids and will be the basis for final payment to the Contractor, except where final measurements are to be made, as hereinafter provided. Payment will not be made for any work that does not meet with the approval of the Engineer. The scheduled quantities of work to be done and materials to be furnished may be increased, decreased, or omitted as hereinafter provided.

The Contractor agrees that he is fully informed regarding all of the conditions affecting the work to be completed, and labor and materials to be furnished for the completion of this Contract, and that his information was procured by personal investigation and research and not from any estimates of the Engineer; and that he will make no claims against the County by reason of estimates, test, or representation of any officer, agent, or employee of the County or the Engineer.

2.2 Proposal Guaranty. Each proposal shall be accompanied by a proposal guaranty. The character and the amount of the proposal guaranty to be furnished by Bidders shall be stated in the proposal for each project. The proposal guaranty shall be executed by some surety company authorized to do business in the State of Missouri, as a guarantee on the part of the Bidder that if his bid be accepted, he will within ten days after receipt of notice of such acceptance, enter into a contract and furnish a contract bond to do the work advertised; and, in case of default, forfeit such proposal guaranty.

2.3 Delivery of Proposals. Each proposal shall be submitted in a sealed envelope marked clearly to indicate its contents. All proposals shall be filed prior to the time and at the location specified in the Notice To Bidders. Proposals received after the time for opening of bids will be returned to the bidder unopened.

SECTION 3 - AWARD AND EXECUTION OF CONTRACT

3.1. Award of Contract. The Contract shall be awarded by the Boone County Commission and confirmed by a Commission Order to the lowest responsible Bidder within a reasonable length of time after opening of bids. The responsibility of the Bidder shall be determined by the Boone County Commission who will base its decision on, among other things, bidder's qualifications, previous work, and financial standing. The successful Bidder will be notified in writing, mailed to the address shown on the proposal, that his bid has been accepted and that he has been awarded the contract.

SECTION 4 - SCOPE OF WORK – This section has been left blank.

SECTION 5 - CONTROL OF WORK

5.1. Cooperation by Contractor. The Contractor will be supplied with four sets of approved plans and contract assemblies including special provisions. One set of approved plans and contract documents including special provisions shall be kept available on the job at all times.

5.2. Authority and Inspection. The Engineer has direct charge of the engineering details of each construction project. The Engineer has the authority to reject defective material and to suspend and reject any work that is being improperly performed.

5.3. Claims for Adjustment. If any conditions arise which in the Contractor's opinion will require him to make any claims or demands for extra or additional compensation above that fixed by the contract, or on which he contemplates bringing claims for such extra compensation, he shall promptly and before incurring any expenses, notify in writing the Engineer of the conditions and circumstances and that he proposes to make such claims. The Contractor agrees that any claims made without such advance notice, and not presented in such a way as to enable the Engineer to observe conditions as they occur and to verify expenses as they occur and to determine with certainty the correctness of such claims and of the expenses involved, are waived and shall be null and void. No extra compensation shall be awarded in any event without prior written approval of the County.

5.4. The Engineer will set initial field control consisting of bench marks and control monuments. The Contractor shall be responsible for the preservation of all bench marks and control monuments, and if any of these bench marks or control monuments are carelessly or willfully destroyed or disturbed, the cost of replacing them may be charged to the Contractor. These bench marks and control monuments will constitute the initial field control by and in accordance with which the Contractor shall establish other necessary controls and perform the work in the correct position to correspond to the information shown on the plans and given by the Engineer during the progress of the work. Elevations shown on the plans and referred to in the specifications are based on the bench marks shown. The Contractor shall employ competent personnel for making position, gradient, and alignment determinations and measurements.

SECTION 6 - CONTROL OF MATERIAL

6.1. Inspection and Certification. Unless otherwise specified, all materials shall be subject to visual inspection and job control test, as determined by the Engineer, and shall be certified by the Supplier that the material supplied conforms to the requirements of these specifications. All certifications shall make reference to the specific project and shall contain the Supplier's name and address.

6.2. Samples, Tests, and Cited Specifications. The Contractor shall submit certifications and substantiating test reports, furnished by the Supplier or Fabricator, certifying that material and manufacturing procedures conform to the specifications. All sampling and testing required by the specifications shall be performed by the Supplier in accordance with these specifications, and the results shall be signed, sealed and stamped according to laws related to professional engineers. There shall be no direct charge to the Owner for materials taken as samples, either for field tests or for laboratory tests. If a specification of a recognized national standard agency (ASTM, AASHTO, AWWA, AWS, etc.) is designated the material may, unless otherwise specified, meet either the designated specification or the latest revision thereof in effect at the time of letting of the contract.

SECTION 7 - LEGAL RELATIONS AND RESPONSIBILITY TO THE PUBLIC

Safety Provisions. Safety on the job is the Contractor's sole responsibility. The Contractor is responsible for proper barricades and/or fences to prevent injury to his or other personnel or the public, and shall leave such barricades and/or fences in place at any time he must be absent from the job site.

SECTION 8 - PROSECUTION AND PROGRESS

8.1. Except in connection with the safety or protection of persons or the Work or property at the site or adjacent thereto, and except as otherwise indicated in the contract documents, all Work at the site shall be performed during regular working hours, and the Contractor will not permit overtime work or the performance of Work on Saturday, Sunday or any legal holiday without Owner's written consent given after prior written notice to the Engineer.

8.2. Contractor shall notify the Engineer a minimum of forty-eight hours in advance of intent to perform Work.

SECTION 9 - MEASUREMENT AND PAYMENT

9.1. The Engineer will make payment estimates on or about the 1st and the 15th of each month of the work performed and the value thereof at the contract unit prices. The proper percentage with relation to completion will be allowed for all incomplete items.

9.2. No payments will be made on account of materials not yet incorporated into the work.

9.3. From the total amount of work items of each estimate, there will be deducted ten percent. The retained percentage will be released as provided in Section 9.13. The net amount due on the estimate will be certified to the County for payment. This method of retained percentage does not apply to work involving the planting of tree, shrubs and other plants.

9.4. Payment may be withheld or nullified in whole or part to such extent as may be necessary to protect the County from loss on account of:

- a. Failure to properly submit material certifications and substantiating test reports required under Section 6.1. and Section 6.2.
- b. Failure to properly submit certified copies of labor payrolls required under Section 10.
- c. Defective work not remedied.
- d. Failure of the Contractor to properly make payment to suppliers or subcontractors for material and/or labor.
- e. A reasonable doubt that the contract can be completed for the balance then unpaid.
- f. Damage to another Contractor.

9.5. If the plans have been altered or when disagreement exists between the Contractor and the Engineer as to the accuracy of the plan quantities, either party has the right to request a recomputation of contract quantities of excavation within any area by written notice to the other party. The written notice shall contain evidence that an error exists in the original ground line elevation or in the original computations which will materially affect the final payment quantity. If such final measurement is required, it will be made from the latest available ground surface and the design section.

9.6. Borrow quantities will not be measured. If additional fill material is required for the construction of embankment or for other proportions of the work, it shall be located, furnished, and hauled by the Contractor as necessary, and will be considered incidental to the portion of work. The Contractor shall be responsible for obtaining all necessary permits. No direct payment for locating, furnishing, hauling additional fill material or obtaining permits will be made.

9.7. Measured quantities of excavation will be used where the ground elevations show on the plans are found to be erroneous. No revision of contract quantities will be made if the actual ground elevations are considered to agree generally with the ground line shown on the plans. Where the Engineer authorizes a change in grade, slope, or typical section affecting the volume of excavation allowed for payment, the revised volume will be determined by the average end area method on the basis of the revised grade, slope, or typical section. Where unauthorized deviations result in a decrease in the contract quantities, the deviations will be measured and deducted from the contract quantity.

All prior partial estimates and payments shall be subject to correction by the County in this final estimate and payment.

SPECIAL PROVISIONS

ASPHALT CEMENT PRICE INDEX

MoDot – 2004

MEASUREMENT AND PAYMENT

109.15 Asphalt Cement Price Index. Adjustments will be made to the payments due the Contractor for any plant mix bituminous base, plant mix bituminous pavement, plant mix bituminous surface leveling and asphaltic concrete pavement that contains PG64-22, PG70-22 or PG76-22 when it has been determined that the monthly average price for the midpoint of the published prices of PG64-22 for St. Louis, Missouri area and Kansas City area has fluctuated from the monthly average price of the month the project was bid. The St. Louis, Missouri area and Kansas City area prices will be obtained from the Asphalt Weekly Monitor® published by Poten & Partners Inc. The monthly base price will be the price from the last published Asphalt Weekly Monitor® prior to MoDOT's monthly bid opening. The monthly base price, established prior to the monthly bid opening, shall apply to payment estimates for the following month.

109.15.1 The adjusted contract unit price will be applied to the actual amount of asphalt binder used by the Contractor for all asphalt items that are set up by the wet ton mix. The adjustment will be applied to projects that have a quantity of asphalt wet ton mix pay items over 100 tons. The percentage of virgin asphalt as shown in the job mix formula, in accordance with Sec 401.4 and Sec 403.4, will be the basis for adjustments for any asphalt mix type placed on the project during the monthly index period. The effective asphalt obtained from the use of recycled asphalt pavement (RAP) will not be eligible for adjustment. The base price index for PG64-22 will be applied to the asphalt mix for mixes using PG64-22, PG70-22 or PG76-22.

109.15.2. Basis of Payment To determine the adjustment for any material specified in this provision the following formula will be used.

$$A = (B \times C) \times (D-E)$$

Where: A = Adjustment for mix placed during monthly average index period

B = Tons of Mix Placed during the monthly average index period

C = % of virgin asphalt binder as listed in the job mix formula in use

D = monthly average price at time mix placement

E = monthly average price at time of bid

109.15.3. The engineer will make adjustment payments, as defined above, for the applicable work completed during each month except for projects on which the contractor is being charged liquidated damages, due to working beyond the project completion date, in accordance with Sec 108. In this case, the "D" value used for the price adjustment will be either the last "D" value prior to the date that liquidated damage assessment began or the current monthly "D" value, whichever is lower. If the contractor is being charged liquidated damages due to the contract being beyond the project completion date and the current months "D" value results in a deduction, then the current monthly "D" value will be used.

109.15.4. Optional This provision is optional. If the bidder wishes to be bound by this provision, the bidder shall execute the acceptance form in the Bid. Failure by the bidder to execute the acceptance form will be interpreted to mean election to not participate in the Asphalt Cement Price Index.

FULL DEPTH RECLAMATION WITH PORTLAND CEMENT

1. GENERAL

1.1 Description. Full-depth reclamation (FDR) with cement, shall consist of pulverizing and mixing existing asphalt pavement and base course material with Portland cement, soil and water to produce a dense, hard, cement treated base. It shall be proportioned, mixed, placed, compacted, and cured in accordance with this specification, and shall conform to the lines, grades, thicknesses, and typical cross sections shown in the plan.

2. MATERIALS

2.1 Recycled Asphalt Pavement (RAP) and Base Material. Shall consist of the existing asphalt pavement, existing base course material and/or subgrade material. The base course and subgrade material shall not contain roots, topsoil, or any material deleterious to its reaction with cement. The particle distribution of the processed material shall be such that 100% passes a 3-inch (75 mm) sieve, at least 95% passes a 2-inch (50 mm) sieve, and at least 55% passes a No. 4 (4.75 mm) sieve.

2.1.1. Mix Design - Not required for this project. Contractor shall use 6% cement by weight to produce the FDR material.

2.2 Portland Cement. Shall comply with the latest specifications for portland cement (ASTM C 150, ASTM C 1157, or AASHTO M 85) or blended hydraulic cements (ASTM C 595, ASTM C 1157, or AASHTO M 240).

2.3 Water. Shall be free from substances deleterious to the hardening of the cement-treated material.

3. EQUIPMENT

3.1 Reclaimer. The reclaimer shall be self-propelled and capable of fully reclaiming the existing road to the depth required, incorporate the cementitious material and water, and mix the materials to produce a homogeneous material. The machine shall be capable of reclaiming no less than 8 feet (2.4 m) wide and up to 12 inches deep in each pass. A machine with a width less than 8 feet (2.4 m) may be approved by the engineer upon demonstration of sufficient mixing capabilities. The reclaimer shall have a system for adding water or slurry with a full width spray bar consisting of a positive displacement pump interlocked to the machine speed so that the amount of water or slurry being added is automatically adjusted with changes in machine speed. Individual valves on the spray bar shall be capable of being turned off as necessary to minimize cementitious material overlap on subsequent passes.

3.2 Mixing Methods. Mixing shall be accomplished in place, using single-shaft or multiple-shaft mixers. Agricultural disks or motor graders are not acceptable mixing equipment.

3.3 Cement Proportioning. Spreading of the portland cement shall be done with a spreader truck designed to spread dry particulate such as portland cement to insure a uniform distribution. Spreaders or distributors used shall be able to demonstrate a consistent and accurate application rate, as well as dust control during application. The mechanical cement spreader shall be capable of dispensing a measured quantity of cement +/- 3 lbs per square yard in advance of the pulverizer just prior to each pass of the stabilizing operation. The pulverizer shall abut or slightly overlap (.5") previous pass to ensure a continuous homogeneous mass of granular material and cement. Cement spreader does not have to abut or overlap previous pass as long as the calculated quantity of cement is dispersed in front of the pulverizer.

3.4 Application of Water. Water may be applied through the mixer or with water trucks equipped with pressure-spray bars. If using the spray bar system, road base shall be pre-wet to obtain optimum moisture content prior to the dispensing of cement.

3.5 Motor Grader. A motor grader for pre-shaping, aerating, spreading and final shaping of the material is necessary. The motor grader shall have a cross slope indicator.

3.6 Rollers. All rollers shall be self-propelled. A vibratory padfoot roller no less than 20,000 lbs (9,000 kg) is required with a drum no less than 84 inches (2100 mm) wide; a blade is recommended for back-dragging. At least one pneumatic roller shall have a minimum gross operating weight (mass) of no less than 12.5 tons (11.3 Mg). At least one smooth steel drum vibratory roller shall have a gross operating weight (mass) of no less than 10 tons (9 Mg) and a width of no less than 78 inches (1980 mm). Rollers shall have properly working scrapers and water spraying systems. Diesel fuel, fuel oil or other detrimental products shall not be used as wetting agents. If the reclamation depth is 4 inches (100 cm) or less, a padfoot roller will be optional. If no padfoot roller is used, then the pneumatic roller shall weigh a minimum of 25 tons (22.6 Mg).

4.0 CONSTRUCTION METHODS

4.1 Weather Limitations. FDR operations shall be completed when the atmospheric temperature is 50 F (10 C) and rising. All equipment shall be off the road 30 minutes before sunset when constructed under traffic. The weather shall not be foggy or rainy and shall not call for freezing temperatures within seven days after placement of any portion of the project.

4.2 Vegetation Removal. Grass and other vegetation shall be removed from the edge of the roadway to be reclaimed to prevent contamination of the material during the reclaiming operation.

4.3 Cementitious Material Spreading. Cementitious material shall be applied to the asphalt surface with a spreading device capable of uniformly spreading the amount required. The spreading device shall be capable of spreading the cementitious material both laterally and longitudinally in an even and accurate manner. Spreading with a motor grader or pneumatic blower shall not be allowed. Additives shall be introduced by a calibrated device through wet or dry methods. The FDR operation shall be suspended when winds create an excessive amount of blowing dust or cementitious material.

4.4 Reclaiming. Operations shall be scheduled so that the elapsed time between the initial mixing of the cementitious material and the completion of padfoot rolling does not exceed 30 minutes. If the 30 minutes is exceeded on an uncompacted lift, the uncompacted material will be retreated as directed by the Engineer. Proposals may be submitted to the Engineer including the use of alternate methods, alternate equipment or set retarding additives, if suitable laydown and compaction is not achieved. Final rolling pass shall be completed within one hour of the initial mixing. If an additional pass of the reclaimer significantly improves dispersion of the cementitious material material, then this additional pass shall be required for the entire project.

4.5 Initial Compaction. The breakdown roller, padfoot or pneumatic, shall not be behind the reclaimer by more than 500 feet (150 m). The padfoot roller, applying high amplitude and low frequency, or the pneumatic roller shall perform initial compaction at enough passes until the roller walks out of the material. Walking out for the padfoot roller shall be when light is clearly evident between all of the pads at the material–padfoot drum interface. Walking out for the pneumatic roller shall be when no significant wheel impressions are left on the surface.

4.6 Shaping. After the completion of padfoot rolling, any remaining padfoot marks shall be removed and the material spread using a motor grader to cut no deeper than the depth of the padfoot marks. The desired slope and shape shall be achieved. After the first day of cementitious material addition, the reclaimed base shall not be shaped to prevent chunking.

4.7 Intermediate and Final Compaction. The vibratory double-drum steel roller and pneumatic roller shall compact the bladed material. The best combination of number of passes and order of rollers shall be used to meet compaction requirements. The finish roll shall not be in vibratory mode.

4.8 Curing. Within two hours after adding the cementitious material and water, a fog seal shall be applied in accordance with Sec 413.50 with one-half the rate of placement being applied in two passes. The reclaimed surface shall be wetted with a light water spray prior to placement of the first pass of fog seal. Blotter sand may be required if traffic experiences pick up of the fog seal. The fog seal may be waived for roadways not immediately opened to traffic. When a fog seal is not placed, the surface shall be kept in a moist condition by periodically fogging with water or covering with moist material for a minimum of 3 days or until the next pavement layer is placed.

4.9 Smoothness. The completed surface shall not vary more than 0.25 inch (6 mm) from the lower edge of a 10-foot (3 m) straight edge placed on the surface parallel and transversely to the centerline.

4.10 Repairing. Areas in the recycled roadway that develop cracking and/or settlement after the cold recycling process shall be repaired. These repairs shall be by deep patching and completed prior to placement subsequent layers. The existing asphalt surfacing material, base and subgrade soil as required shall be removed and replaced with the type of asphaltic concrete being produced on the project at that time and properly compacted to produce a stable repair.

4.11 Equipment Innovation. Other methods and equipment as approved by the engineer will be allowed.

5.0 QUALITY CONTROL

5.1 Contractor's Responsibility. The contractor shall be responsible for quality control of all material and the reclaiming process.

5.2 Material Sizing. Samples of the reclaimed material shall be obtained before beginning compaction and sieved over the sieves to determine compliance with the following maximum particle size requirements. The resulting gradation shall be compared to the mix design gradations to determine any necessary changes to the cementitious material content. Sampling procedures shall be in accordance with AASHTO T 168.

Sieve Size	% Passing by Weight
3.0 in. (50mm)	100
2.0 in. (44mm)	>95
No. 4 (4.75mm)	>55

5.3 Cementitious Material Content. The amount of cementitious material used shall be 6% by dry weight. Any changes to the cementitious material content will need to be approved by the engineer prior to altering the content. The percentage of cementitious material added shall be checked by determining the amount used by meter readings or truck weight (mass) tickets and by estimating the quantity of road reclaimed – depth, width, length, and estimated in-place density by Proctor density, mix design or field check, or by nuclear density. On the first day of FDR operations, the cementitious material content shall be determined at a minimum on the first cementitious material transport. Adjustments in equipment calibration shall be made if necessary. If adjustments are made, the cementitious material content shall be checked again. Thereafter, the cementitious material content shall be determined at a sampling frequency at the engineer's discretion.

5.4 Moisture Content. Moisture content shall be checked by microwave oven in accordance with ASTM D 4643 or equivalent methods, such as a nuclear gauge, direct heating or infrared. Minimum sample size shall be 700 grams for the microwave procedure after the material has been screened through a ¾-inch (19.0 mm) sieve. If the average moisture content is not within one percent of the mix design recommendation, then the moisture content shall be adjusted by moisture addition with a water truck or by aeration. If the moisture content has been manipulated, the moisture content shall be re-checked. The moisture content sample shall be to the depth of reclamation and taken by any suitable method. The sides of the sample hole shall be perpendicular to the road surface. Samples shall be kept sealed until the samples are ready for testing. The moisture content shall be checked, at minimum, on three reclaimer passes on the first day of FDR. After the first day, moisture content sampling frequency shall be at the engineer's discretion.

5.5 Depth Control. The reclaiming depth during all operations shall be monitored regularly to determine compliance with the plans. The depth shall be determined on

each side of the reclaimer pass and shall be adjusted immediately as necessary. The contractor shall take precautions so as not to damage any existing drainage or pipes. Any pipes damaged by the contractor shall be repaired or replaced at the contractor's expense as directed by the engineer.

5.6 Reclaimed Material Compacted Density. Density shall be a minimum of 95% of the "standard" maximum dry density and be within -2 to +2 percent of the optimum moisture content as described by ASTM D698. A minimum of two test strips shall be completed to determine the optimum rolling pattern to obtain the required density. Test strips failing to meet the required density shall be reprocessed. Test strips meeting density requirements shall remain as part of the finished work. Care shall be taken not to over-roll the mat based on visual observations of check cracking or shoving. A new rolling pattern may need to be established if conditions change or it found the required density is not achieved.

6.0 QUALITY ASSURANCE. Samples will be taken daily to determine the compressive strength is greater than 100 psi (690 kPa). Areas represented by an average compressive strength 100 psi (690 kPa) or less shall be reprocessed. Sampling and compaction will be within 30 minutes of mixing.

7.0 METHOD OF MEASUREMENT

Work as described for this item will be measured to the nearest 0.1 square yard (0.1 m²) of the completed sections for the depth specified. Final measurement will not be made except for changes authorized by the engineer. Measurement of cementitious material to the nearest one ton (1 Mg) will be made based upon the mix design.

9.0 BASIS OF PAYMENT

9.1 Quantity. The accepted quantities of FDR shall be paid at the contract unit bid price "Full Depth Reclamation", per square yard. Cementitious material will be included in the unit bid price for Full Depth Reclamation. A Portland cement content of 6.0 % for FDR by weight (mass) of the reclaimed material shall be used for bidding purposes.

END OF SECTION
