

Dust Control FAQs

Dust Control Questions and Information for Boone County Citizens

- **Who is the vendor that can provide Dust Control on my county road?**
 - Currently, Scotwood Industries, Inc. is the only **approved provider** for dust control on Boone County roads for 2015. Contact them for current pricing.
 - General Customer Service phone numbers and website:
 - <http://www.scotwoodindustries.com/>
 - 1-800-844-2022
 - 913-851-3500
- **Boone County citizens can register with Scotwood through May 15th for dust control and that application will begin after June 1st.**
- **When is the best time to request to have dust control put on my road?**
 - Boone County citizens can call Scotwood Industries directly to register for dust control for their road through May 15th. Scotwood then sends the list of registered clients to Boone County Public Works, where we will prepare the road for dust control by grading it before the application process begins. Scotwood starts the application process after June 1st.
 - After May 15th, Boone County Public Works is no longer coordinating Scotwood Industries and instead the citizen is responsible for contacting Scotwood and scheduling the dust control treatment. The citizen may call Boone County Public Works and request the road to be graded before the application process begins, but it is not guaranteed that the road will be prepared before treatment due to other higher priority projects. BCPW suggests you call for dust control before the May 15th deadline to guarantee your road will be prepared before treatment.
- **Important Facts to Know:**
 - The citizen is responsible for “flagging” the area that needs to have dust control
 - There is a minimum of 300 ft of gravel road necessary for dust control
