3. BID SUBMISSION

3.1 Bid Submission Information:

3.1.1 All bids must be received in a sealed envelope/packaging clearly marked "Motorgraders".

3.1.2 All bids must be received at the office of the RFB Coordinator as outlined in Section 1. "INTRODUCTION AND GENERAL INFORMATION".

3.1.3 The bidder may withdraw, modify or correct his/her bid after it has been deposited with MoDOT provided such request is submitted in writing and received at the location designated for the bid opening prior to the date and time specified for opening bids. Such a request received as specified will be attached to the bid and the bid will be considered to have been modified accordingly. No bid may be modified after the date and time specified for the opening of bids.

3.1.4 Open Competition / Request For Bid Document:

- a. It shall be the bidder's responsibility to ask questions, request changes or clarification, or otherwise advise MoDOT if any language, specifications or requirements of an RFB appear to be ambiguous, contradictory, and/or arbitrary, or appear to inadvertently restrict or limit the requirements stated in the RFB to a single source. Any and all communication from bidders regarding specifications, requirements, competitive bid process, etc., must be directed to the buyer from MoDOT, unless the RFB specifically refers the bidder to another contact. Such communication should be received at least three (3) working days prior to the official bid opening date.
- b. Every attempt shall be made to ensure that the bidder receives an adequate and prompt response. However, in order to maintain a fair and equitable bid process, all bidders will be advised, via the issuance of an amendment to the RFB, of any relevant or pertinent information related to the procurement. Therefore, bidders are advised that unless specified elsewhere in the RFB, any questions received less than three (3) working days prior to the RFB opening date may not be answered.
- c. Bidders are cautioned that the only official position of the MoDOT is that which is issued by MoDOT in the RFB or an amendment thereto. No other means of communication, whether oral or written, shall be construed as a formal or official response or statement.
- d. MoDOT monitors all procurement activities to detect any possibility of deliberate restraint of competition, collusion among bidders, price-fixing by bidders, or any other anticompetitive conduct by bidders which appears to violate state and federal antitrust laws. Any suspected violation shall be referred to the Missouri Attorney General's Office for appropriate action.

3.1.5 Contract Award:

- a. This is a Multiple Award bid and there will be no 'one' bidder awarded each item within this bid. Each individual delivery destination will have sole responsibility for the discretion of all purchasing decisions. Criteria used to determine the "lowest and best" bid are based on price, location of servicing dealers, past performance of servicing dealers, and past performance of different makes and models of motorgraders. This bid will not be awarded solely based on low price per delivery destination. Units must be delivered to the listed delivery destinations but they will have to be serviced at other locations within the district.

CONDITIONS OF APPROVAL:

1. Hours of operation shall be limited to:
 - Monday through Friday 7 AM to 7 PM
 - No operation Saturday and Sunday
 - No operation on New Years Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day and Christmas Day
2. A land disturbance permit shall be acquired prior to any earth moving on the site. The permit shall specifically identify the portion of the site where topsoil is to be removed on an annual basis.
3. When the topsoil removal site is adjacent to Perche Creek the stream buffer shall be staked so as to prevent removal of soil from within the stream buffer.
4. The topsoil removal operation shall be limited to 20 acres per year which will be enforced through the Land Disturbance Permit
5. The operator shall employ the use of management practices to prevent mud, dirt or debris from being deposited on public roads to the satisfaction of the Director of Resource Management.
6. The operator shall maintain the access road in a dust free condition to the satisfaction of the Director of Resource Management.
7. This use is restricted to vehicles or equipment having rubber tracks or rubber tires.
8. Vehicular traffic from the site is limited to 30 loads a day. A load is considered one truck exiting the property with any part of a cargo of topsoil that has been produced on the property and will produce 60 one-way trips to and from the property.

In the event the Director of Resource Management of Boone County, upon written complaint from at least two residents who reside within 1000 feet of the access point to the site from the public right-of-way, determines that there are reasonable grounds to believe that the daily load restriction has been exceeded, then the Director may require that traffic counts be conducted pursuant to the following conditions.

- a) The Director's determination that a traffic count is required shall be based upon a reasonable and good faith belief formed after reviewing objective evidence of such violations. If the Director makes such a determination, the Director shall provide a written notice to the Applicants that the Director has determined that a traffic count be conducted to establish whether the above limitations are being exceeded.
- b) The Applicants, at the Applicants' expense, shall arrange for a Portable Traffic Analyzer to be installed at the access point to the public right-of-way. Such Portable Traffic Analyzer shall remain in place for a period of not less than 30 days. The applicant may contract with a qualified firm to conduct and report the traffic counts identified by the Portable Traffic Analyzer, provided such firm and device are approved by the Director. Minimum data collected shall include Vehicle Count, Vehicle Length Classification, and Vehicle Speed,

Alternatively, the applicant may lease or purchase a traffic counter and request that such device be placed and monitored by Boone County Resource Management. In exercising this option the applicant shall ensure the device is compatible with the Portable Traffic Analyzers that are used by Boone County Resource Management and utilizes the same software as that used by Boone County Resource Management.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

The Boone County Commission finds and concludes in issuance of this permit that:

(a) The establishment, maintenance or operation of a conditional use permit will not be detrimental to or endanger the public health, safety, comfort or general welfare.

Externalities such as noise, dust and exhaust fumes should not impact the public due to the isolated nature of the project site. Conditions of approval requiring dust control on the access road should adequately address the possibility of dust related impacts.

Noise will be mitigated by the elevation difference between the project site and nearby residential areas and limited hours of operation.

(b) The conditional use permit will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted by these regulations.

Activities in the area that are already permitted include agricultural and residential uses. Much of the project activity will be similar in nature to the agricultural uses that have been occurring on the property for several decades. For example, topsoil removal utilizes mechanical scrapers which will sound like a farm tractor from a distance. The noise will occur over a longer period of time however, because the topsoil removal occurs between harvest and planting.

The limited hours of operation will confine the likely impacts to hours when most homeowners are at work or school. However, topography and conditions of approval will provide additional mitigation of impacts.

(c) The conditional use permit will not substantially diminish or impair property values of existing properties in the neighborhood.

Due to the limited nature of the potential offsite impacts and the proposed conditions of approval it is unlikely that the use will result in diminished or impaired property values in the area.

(d) All necessary facilities will be available, including, but not limited to, utilities, roads, road access and drainage.

The proposed use does not require any public utilities. The proposed use will utilize Smith Drive which is a collector street and Scott Boulevard, an arterial for access. Both streets should be able to sustain the additional truck traffic.

(e) The establishment of a conditional use permit will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the zoning district.

Most of the surrounding property that is outside of the 100-year floodplain has already been developed. The site is separated by areas not within the floodplain by topography. There is an elevation difference between the site and adjacent residential areas ranging from 70 to 120 feet. This should provide adequate screening of the topsoil operation from adjacent residential uses and any undeveloped properties.

(f) The establishment of a conditional use permit will not hinder the flow of traffic or result in traffic congestion on the public streets. This will include the provision of points of access to the subject property.

The applicant anticipates approximately 20 to 30 truck loads per day. Averaging 30 loads over the 12 hour per day operating window yields an hourly traffic count of 2.5 trucks per hour. This will not result in traffic congestion on area roads.

(g) The conditional use permit shall in all other respects conform to the applicable regulations of the zoning district in which it is located. The County Commission shall find that there is a public necessity for the conditional use permit.

Conditions of approval address the need to obtain a Land Disturbance permit and comply with the Stream Buffer Regulations. All other applicable regulations are likewise enforceable.

The County Commission finds that there is a public need for properly conditioned topsoil to be used for landscaping and construction projects in the Boone County community.

The Boone County Commission, by authorizing the issuance of this Conditional Use Permit further concludes as a matter of law that the issuance of this Permit is proper under the zoning regulations of Boone County in effect at the time of its issuance and the general statutes and laws of the state of Missouri.

AGREEMENT

THIS AGREEMENT, made and entered into this 16th day of January, 2014, by and between the City of Columbia, Missouri, a municipal corporation, hereinafter called the "City" and Boone County, Missouri, hereinafter called the "County,"

IN CONSIDERATION of the mutual covenants herein contained, it is hereby agreed by and between the Parties as follows:

1. The City agrees to provide the equivalent of two and one-third full-time (2.33 F.T.E) benefited animal control officers for services to Boone County residents living outside the corporate limits of the City. All officers so provided shall be suitably trained employees of the City.
2. The City will provide appropriate materials and supplies associated with supporting the personnel listed in paragraph 1.
3. The City enters into contracts with the Central Missouri Humane Society, a Missouri not-for-profit corporation, for the provision of office space, veterinary care, and kennel facilities. Copies of any such future contracts between the City and the Humane Society or other provider for these services during the term of this agreement shall be forwarded to the Boone County Commission for informational purposes.
4. Capital items previously purchased by the City to provide animal control services for Boone County, the cost of which has been reimbursed by the County, shall continue to be used to provide services under this agreement. Such items, however, shall be returned to the County within thirty (30) days of termination of this agreement unless the parties, by written agreement, provide otherwise.
5. The County shall pay City a proportionate share (33%) of the personnel costs, materials and supplies, utilities, travel and training, and other miscellaneous services and intra-governmental charges of the Animal Control division of the City's Public Health and Human Services Department to fulfill its obligations under this agreement. The proportionate amount shall be determined by dividing the total cost for each such category by the number of City animal control officers and multiplying that number by the two and one-third (2.33) full-time equivalent employees provided County under this agreement.

6. An estimate of the County's annualized cost under this agreement is set forth in Schedule A which is attached to and made a part of this agreement.

7. The parties agree that the City will bill the County on a quarterly basis for one-fourth of the total contract amount. By March 1, 2015, a final report will be prepared and will include appropriate accounting documentation for reconciliation purposes. A statistical report of services rendered by the City to the County will be provided annually.

8. During the term of this Agreement, the City will provide liability insurance coverage on the interior space the Health Department occupies (Unit #1 of the Columbia/Boone County Health Department Condominium) in the same manner that it does for other City-owned facilities.

9. This agreement shall be in full force and effect during calendar year 2014; provided, however, that either party may terminate this agreement upon thirty (30) days written notice of the other party.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be signed and executed by their duly authorized officers as of the day and year first above written.
