1.2. **DEFINITIONS**

1.2.1. "Party of the First Part" or "County" or "Owner" shall mean the County of Boone, Missouri, acting through its authorized County Officials, or appointed representatives.

County - This term refers to the County of Boone, a duly organized public entity. It may also be used as a pronoun for various subsets of the County organization, including, as the context will indicate:

Purchasing - The Purchasing Department, including its Purchasing Director and staff.

Department(s) or Office(s) - The County Department(s) or Office(s) for which this Bid is prepared, and which will be the end user(s) of the goods and/or services sought.

Designee - The County employee(s) assigned as your primary contact(s) for interaction regarding Contract performance.

1.2.2. **Bidder / Contractor / Supplier / "Party of the Second Part"** - These terms refer generally to businesses having some sort of relationship to or with us. The term may apply differently to different classes of entities, as the context will indicate.

Bidder - Any business entity submitting a response to this Bid. Suppliers, which may be invited to respond, or which express interest in this bid, but which do not submit a response, have no obligations with respect to the bid requirements.

Contractor - The Bidder whose response to this bid is found by Purchasing to meet the best interests of the County. The Contractor will be selected for award, and will enter into a Contract for provision of the goods and/or services described in the Bid.

Contractor or "*Party of the Second Part*" - shall mean the party having entered into contract to perform the work herein specified.

Supplier - All business(s) entities which may provide the subject goods and/or services.

"*Director*" shall mean the Director of Boone County Resource Management or his/her designated representative.

"*Engineer*" shall mean the Director or the authorized representative of the Department for whom the work is to be performed.

"*Work*" of the Contractor includes labor or material, or both.

"*As directed*", "*as required*", "*as permitted*", "*acceptable to*" and words of like import shall mean that the direction, requirement or permission of the Engineer is intended.

"*Or equal*" is not intended to impose limitations preventing the free exercise of the Contractor's skill or to exclude products which are satisfactory. Materials and workmanship shall be of the best of their respective kinds. Trade or manufacture's names where used in these specifications are intended to fix the standards of workmanship and materials. Any article or material equaling the standards fixed may be used in place of that mentioned by the specifications provided that the material or article proposed is submitted to and approved by the Engineer. No substitution shall be made unless this definite approval has been obtained in advance.

1.2.3. **Bid** - This entire document, including attachments. A Bid may be used to solicit various kinds of information. The kind of information this Bid seeks is indicated by the title appearing at the top of the first page. A "Request for Bid" is used when the need is well defined. A "Request for Proposal" is used when the County will consider solutions, which may vary significantly from each other or from the County's initial expectations.

1.2.4. **Response** - The written, sealed document submitted according to the Bid instructions.

- 1.3. **BID CLARIFICATION** - Any questions or clarifications concerning bid documents should be addressed to Phil Fichter, Buyer, 613 E. Ash Street, Room 111, Columbia, Missouri 65201. Telephone (573) 886-4392 Fax (573) 886-4390 E-mail: PFichter@boonecountymmo.org.
- 1.3.1. **Bidder Responsibility** - The Bidder is expected to be thoroughly familiar with all specifications and requirements of this Bid. Bidder's failure or omission to examine any relevant form, article, site or document will not relieve them from any obligation regarding this Bid. By submitting a Response, Bidder is presumed to concur with all terms, conditions and specifications of this Bid.
- 1.3.2. **Bid Amendment** - If it becomes evident that this Bid must be amended, the Purchasing Department will issue a formal written amendment to all known prospective Bidders. If necessary, a new due date will be established.
- 1.4. **AWARD** - Award will be made to the Bidder(s) whose offer(s) provide the greatest value to the County from the standpoint of suitability to purpose, quality, service, previous experience, price, lifecycle cost, ability to deliver, or for any other reason deemed by Purchasing to be in the best interest of the County. Thus, the result will not be determined by price alone. The County will be seeking the least costly outcome that meets the County needs as interpreted by the County. The County reserves the right to award this bid on an item by item basis, or an "all or none" basis, whichever is in the best interest of the County.
- 1.5. **CONTRACT EXECUTION** - This Bid and the Contractor's Response will be made part of any resultant Contract and will be incorporated in the Contract as set forth, verbatim.
- 1.5.1. **Precedence** - In the event of contradictions or conflicts between the provisions of the documents comprising this Contract, they will be resolved by giving precedence in the following order:

 - 2) the provisions of the Bid;
 - 3) the provisions of the Bidder's Response.

No later than 45 days after final tests and acceptance final payment shall be due.
- 1.8. The acceptance by the Contractor of the final payment shall constitute a release and waiver of any and all rights and privileges under the terms of the Contract; further, the acceptance by the Contractor of final payment shall relieve the County from any and all claims or liabilities on part of the County relating to or connected with the Contract.
- 1.9. The cost of all licenses and permits and other expenses and costs incidental to the fulfillment of this Contract will be paid by the Contractor, and the total amount of such costs will be included in the total cost of the work.

Compensation to the Contractor will be calculated as an addition to or deduction from the Contract price, based upon such written terms as may be established by the owner, either (a) by an acceptable lump sum proposal of the Contractor, (b) on a cost-plus limited basis not to exceed a specified limit, or (c) on basis of bid or mutually agreed upon unit prices. In the event that none of the foregoing methods are agreed upon with the Contractor, the County may perform the work with its own forces or under separate contract with another contractor.

This provision does not, however, require contractor to indemnify, hold harmless, or defend the County of Boone from its own negligence.

Nothing in these requirements shall be construed as a waiver of any governmental immunity of the County, its officials nor any of its employees in the course of their official duties.

Failure to maintain the required insurance in force may be cause for contract termination. In the event the Agency/Service fails to maintain and keep in force the required insurance or to obtain coverage from its subcontractors, the County shall have the right to cancel and terminate the contract without notice.

The scheduled quantities of work to be done and materials to be furnished may be increased, decreased, or omitted as hereinafter provided.

The Contractor agrees that he is fully informed regarding all of the conditions affecting the work to be completed, and labor and materials to be furnished for the completion of this Contract, and that his information was procured by personal investigation and research and not from any estimates of the Engineer; and that he will make no claims against the County by reason of estimates, test, or representation of any officer, agent, or employee of the County or the Engineer.

- 2.17.2. **Bid Guaranty.** Each bid shall be accompanied by a bid guaranty. The character and the amount of the bid guaranty to be furnished by Bidders shall be stated in the bid for each project. The bid guaranty shall be executed by some surety company authorized to do business in the State of Missouri, as a guarantee on the part of the Bidder that if his bid be accepted, he will within ten days after receipt of notice of such acceptance, enter into a contract and furnish a contract bond to do the work advertised; and, in case of default, forfeit such bid guaranty.

- 2.17.3. **Delivery of Bid.** Each bid shall be submitted in a sealed envelope marked clearly to indicate its contents. - 2.19.3. **Claims for Adjustment.** If any conditions arise which in the Contractor's opinion will require him to make any claims or demands for extra or additional compensation above that fixed by the contract, or on which he contemplates bringing claims for such extra compensation, he shall promptly and before incurring any expenses, notify in writing the Engineer of the conditions and circumstances and that he proposes to make such claims. The Contractor agrees that any claims made without such advance notice, and not presented in such a way as to enable the Engineer to observe conditions as they occur and to verify expenses as they occur and to determine with certainty the correctness of such claims and of the expenses involved, are waived and shall be null and void. No extra compensation shall be awarded in any event without prior written approval of the County.
- 2.19.4. The Engineer will set initial field control consisting of bench marks and control monuments. The Contractor shall be responsible for the preservation of all bench marks and control monuments, and if any of these bench marks or control monuments are carelessly or willfully destroyed or disturbed, the cost of replacing them may be charged to the Contractor. These bench marks and control monuments will constitute the initial field control by and in accordance with which the Contractor shall establish other necessary controls and perform the work in the correct position to correspond to the information shown on the plans and given by the Engineer during the progress of the work. Elevations shown on the plans and referred to in the specifications are based on the bench marks shown. All sampling and testing required by the specifications shall be performed by the Supplier in accordance with these specifications, and the results shall be signed, sealed and stamped according to laws related to professional engineers. There shall be no direct charge to the Owner for materials taken as samples, either for field tests or for laboratory tests. If a specification of a recognized national standard agency (ASTM, AASHTO, AWWA, AWS, etc.) is designated the material may, unless otherwise specified, meet either the designated specification or the latest revision thereof in effect at the time of letting of the contract.

public, and shall leave such barricades and/or fences in place at any time he must be absent from the job site.

2.22. **PROSECUTION AND PROGRESS**

2.22.1. Except in connection with the safety or protection of persons or the Work or property at the site or adjacent thereto, and except as otherwise indicated in the contract documents, all Work at the site shall be performed during regular working hours, and the Contractor will not permit overtime work or the performance of Work on Saturday, Sunday or any legal holiday without Owner's written consent given after prior written notice to the Engineer.

2.22.2. Contractor shall notify the Engineer a minimum of forty-eight hours in advance of intent to perform Work.

2.23. **MEASUREMENT AND PAYMENT**

2.23.1. The Engineer will make payment estimates on or about the 1st and the 15th of each month of the work performed and the value thereof at the contract unit prices. The proper percentage with relation to completion will be allowed for all incomplete items.

2.23.2. No payment will be made on account of materials not yet incorporated into the work.

2.23.3. From the total amount of work items of each estimate, there will be deducted ten percent. The retained percentage will be released as provided in Section 9.13. The net amount due on the estimate will be certified to the County for payment. This method of retained percentage does not apply to work involving the planting of tree, shrubs and other plants.

2.23.4. Payment may be withheld or nullified in whole or part to such extent as may be necessary to protect the County from loss on account of:

- a.) Failure to properly submit material certifications and substantiating test reports required under Section 6.1. and Section 6.2.
- b.) Failure to properly submit certified copies of labor payrolls required under Section 10.
- c.) Defective work not remedied.

If the plans have been altered or when disagreement exists between the Contractor and the Engineer as to the accuracy of the plan quantities, either party has the right to request a recomputation of contract quantities of excavation within any area by written notice to the other party. The written notice shall contain evidence that an error exists in the original ground line elevation or in the original computations which will materially affect the final payment quantity. If such final measurement is required, it will be made from the latest available ground surface and the design section.

2.23.6. Borrow quantities will not be measured. If additional fill material is required for the construction of embankment or for other proportions of the work, it shall be located, furnished, and hauled by the Contractor as necessary, and will be considered incidental to the portion of work. The Contractor shall be responsible for obtaining all necessary permits. No direct payment for locating, furnishing, hauling additional fill material or obtaining permits will be made.

2.23.7. Measured quantities of excavation will be used where the ground elevations show on the plans are found to be erroneous. No revision of contract quantities will be made if the actual ground elevations are considered to agree generally with the ground line shown on the plans. Where the Engineer authorizes a change in grade, slope, or typical section affecting the volume of excavation allowed for payment, the revised volume will be determined by the average end area method on the basis of the revised grade, slope, or typical section. Where unauthorized deviations result in a decrease in the contract quantities, the deviations will be measured and deducted from the contract quantity.

2.23.8. Payment for the removal and replacement of any unsuitable material will be at the contract unit price for additional depth dig-out repair.

2.23.8. **Release of Retained Percentages:**

- 2.23.8.1. Prior to any release of retained percentage the Contractor shall file with the County the following:

Distributor: The contractor shall provide a distributor, for heating and applying bituminous materials that meet the requirements of Section 409.4 of Missouri Standard Specifications for Highway Construction. The tachometer shall be readily visible to the operator and have a dial reading r e g i s t e r i n g liters per minute (gallons per minute) passing through the nozzle. The tachometer well shall not be in contact with heating tube. A hose and spray nozzle attachment shall be provided for applying asphalt material to patches and areas inaccessible to the spray bar. The distributor shall be provided with heaters that can be used to bring the asphalt material to the spray application temperature. The distributor shall have a computer controlled application system and be equipped with a bitumeter with a dial gauge registering (feet) meter of travel per minute and shall be visible by the driver.

The extended width of application of the spray bar shall be 16 feet with provision for lesser width when necessary.

The distributor shall be provided with a full circulatory system that includes the spray bar.

The distributor shall be cleaned of foreign contaminants before it is used.

- 2.33.3.2. Broom: A mechanical type power broom shall be used for removing loose material from the surface to be treated. The broom shall be equipped with plastic bristles.
- 2.33.3.3. Rollers: A minimum of two oscillating-type pneumatic-tire rollers shall be required to roll aggregate after spreading. The pneumatic-tire rollers shall be self-propelled with smooth-tread pneumatic tires of equal size staggered on the axles at such spacing and overlaps as will provide uniform pressure to seat the cover aggregate into the bituminous material without fracturing the aggregate particles. The pneumatic-tire rollers shall weight from 5 to 8 tons, shall be operated at a speed not to exceed 5 mph, shall have a contact pressure of 60 psi to 80 psi and shall have a total compacting width of not less than 60 inches.
- 2.33.3.4. Aggregate Spreader: The aggregate spreader shall be a self-propelled mechanical spreader, equipped with a computer guided system and positive controls capable of uniformly distributing a 24 foot wide band of aggregate at a prescribed rate in a single-pass operation over the surface to be sealed. The operation of aggregate spreaders at speeds which cause aggregate to 'roll over' after striking the emulsion covered surface will not be permitted. Aggregate spreaders will not be operated on uncovered polymer modified emulsified asphalt. Spreaders shall be calibrated before operation on the project.
- 2.33.3.5. Hauling Equipment: Hauling equipment shall be operated in a prudent manner and at moderate speeds that will not damage the new chip seal or create a hazard to the traveling public. Trucks that transport aggregate shall be legally licensed, in good working condition, and be equipped with the safety devices required by the United States Department of Transportation. All trucks shall be a t t a c h e d to spreader by mechanical means to minimize spillage.

2.33.4. **CONSTRUCTION REQUIREMENTS**

- 2.33.4.1. Weather Limitations: Polymer modified emulsified asphalt shall not be applied when the pavement or air temperature is below 70°F, nor if the relative humidity is higher than 75%, nor if the wind velocity will prevent the uniform application of the bitumen or aggregate. The chip

seal coat shall be applied when the pavement surface is dry, and when the weather is not foggy or rainy. The placing of polymer modified emulsified asphalt preservation chip seal coat will not be allowed before May 1 or after September 30.

- 2.33.4.2. Preparation of Surface: Immediately before applying the polymer modified emulsified asphalt, any loose material, grease, and other petroleum distillates, dirt, clay, or other objectionable organic or inorganic materials shall be removed from the surface to be sealed. Cleaning shall be performed by sweeping, flushing, or other means necessary to remove all objectionable material from the pavement surface. Material removed from the surface shall not be mixed with the cover aggregate. The surface should be clean and dry as approved by the Engineer.
- 2.33.4.2.1. **Additional Post-Sweeping at County's Discretion.** This sweeping would be performed approximately 30 days after treatment and will be used at the County's discretion or may not be used at all. CONTRACTOR should provide in the space provided on the bid form a minimum quantity required to perform additional sweeping.
- 2.33.4.2.2. The CONTRACTOR shall be responsible for furnishing and placing masking materials over all sewer, utility, and traffic control device covers and inlet grates located in the roadways to be treated. All such material shall be removed and disposed of after the surfacing material has cured.
- 2.33.4.3. Application of polymer modified emulsified asphalt: The polymer modified emulsified asphalt shall be applied by means of a pressure distributor in a slow, uniform, continuous spread, without missing or overlapping, at a truck speed consistent with the placement of the cover aggregate. Boone County would prefer for the roads to be treated full width, however if this is not possible, polymer modified emulsified asphalt shall be applied one-half the width of the surface at a time, with the center lap of the application placed at the lane line of the traveled way and kept as narrow as practicable. The other side of the roadbed shall be left open to traffic. Polymer modified emulsified asphalt shall not be applied at a greater distance than can be immediately covered by aggregate before the emulsion breaks or as approved by the Engineer.
- 2.33.4.3.1. The application rate of polymer modified emulsified asphalt for the chip seal shall be within the limits in Section 2. A minimum of 200 gallons of polymer modified emulsified asphalt shall remain in the distributor tank at all times except for the last shot on the project. The emulsion should be uniformly applied through the pressure distributor at a temperature specified by the Engineer between 150°F and 185°F. The temperature used for spraying at a given spray bar pressure should not be that which causes fogging when the asphalt material leaves the spray bar.
- 2.33.4.3.2. The angle of the spray nozzles and the height of the spray bar shall be set to provide a triple coverage fan pattern. The frame of the distributor shall be blocked or snubbed to the axle of the truck to maintain a constant spray bar height above the road surface during discharge of the load. An alternate method of maintaining constant spray bar height may be approved.
- 2.33.4.3.3. To ensure uniform application of the polymer modified emulsified asphalt at the beginning of each distributor load, a portion of the roadbed surface shall be covered with building paper. The area covered by the building paper shall be used at the starting point for each distributor load or each part of a load after a temporary delay. If the cut-off is not positive on the distributor, the use of paper shall be required at the end of each spread. For the next application, the leading edge of the paper is placed within ½" of the cut off line of the previously laid treatment. The paper shall be removed and disposed of in an approved manner. The distributor shall be moving forward at the proper application speed when the spray bar is opened. A hand spray shall be used apply emulsified asphalt necessary to touch up all spots missed by the distributor.

Any skipped areas or deficiencies shall be corrected. Junctions of spreads shall be carefully made to insure a smooth riding surface. The application of emulsified asphalt on adjacent Portland cement or asphaltic concrete pavements, curbs, bridges, or any areas not specified to be sealed shall be avoided. The CONTRACTOR shall immediately clean up any such spills to the satisfaction of the Engineer.

- 2.33.4.3.4. If the chip seal is to be constructed on a bituminous surface in which the binder material was other than asphalt cement, the placing chip seal coat will not be permitted until the underlying bituminous course has cured 15 to 30 days, as directed by the Engineer.
- 2.33.4.3.5. From 4 to 6 inches of the centerline edge of the initially treated lane shall be left uncovered with aggregate to allow for an overlap of asphalt binder when the remaining half of the surface is treated. The CONTRACTOR will be required to remove the excess material occurring as a result of dual application of product along construction seams.

2.33.5. **APPLICATION OF COVER AGGREGATE**

- 2.33.5.1. In general, the cover aggregate shall be placed within 30 seconds following the application of the emulsified asphalt. Operations shall not proceed in such a manner that the emulsified asphalt will be allowed to chill, set up, dry or otherwise impair retention of the cover aggregate. The cover aggregate shall be spread by means of a self-propelled mechanical spreader accurately measuring and uniformly spreading the aggregate.
- 2.33.5.2. The quantity of cover aggregate to be used per square yard shall be in accordance with Section 2 depending on the physical properties of the material used. The Engineer shall determine the exact rate. Aggregates shall be dry or surface damp (saturated surface dry – SSD) at the time of application. SSD shall be considered the condition when no visible film of water exists on the aggregate. The moisture content of the aggregate shall not exceed 2% by weight. The Engineer may require that the cover aggregate be moistened with water to enhance cohesive properties of the emulsified asphalt. Spreading shall be accomplished in a continuous manner, without stopping between trucks, and in such manner that the tires of the trucks or aggregate spreader at no time contact the uncovered and newly applied emulsified asphalt. All portions of the surface not covered by mechanical spreaders shall be hand spotted so that the entire surface will be uniformly covered. Light hand brooming may be necessary to distribute excessive aggregate.
- 2.33.5.3. Rolling: Rolling shall begin immediately behind the spreader and shall consist of at least two complete coverage's with the pneumatic-tire roller. Initial rolling shall consist of one complete coverage and shall begin immediately behind the spreader. Initial rolling shall be completed within 15 minutes of the time that the aggregate was spread. Asphaltic emulsion and aggregate shall not be spread more than 1,000 feet ahead of completion of initial rolling operations. The second roller shall be used for the second complete coverage to smooth and adequately seat the aggregate. All rolling shall be completed the same day as the cover aggregate is applied. Rolling shall proceed in a longitudinal direction, beginning at the outer edges of the treated surface and working toward the center. Each pass by the roller shall overlap the previous pass by one-half the width of the front wheels.
- 2.33.5.4. Brooming: The CONTRACTOR will be responsible for sweeping all loose aggregate after the embedded aggregate has set. Sweepings should be disposed of off-site, or in areas where the amount of sweepings will negatively affect drainage, mowing, or ascetics of adjacent ditches and yards.

2.33.6. **TRAFFIC CONTROL**

- 2.33.6.1. Traffic Control and Safety: No traffic shall be permitted on the seal coat until all rolling has been completed. The Contractor shall control traffic for at least two hours after the completion of rolling. The CONTRACTOR'S supply trucks shall observe these traffic controls.
- 2.33.6.2. The beginning and end of the work zones shall have the following signs posted: 'Flagger Ahead', 'Fresh Oil', and 'Road Construction Ahead'. All side streets shall have 'Road Construction Ahead' signs placed as directed by the Engineer and all signs shall conform to Section 1041 Construction Signs. All signs shall be installed on permanent holding frames, one foot above the ground and shall remain in place at each job site until all sweeping operations are complete. Signs shall be safely installed so not to block vehicle or pedestrian line of sight and shall be resistant to wind gusts.
- 2.33.6.3. In accordance with Section 616 flaggers equipped with 2-way hand-held radios shall assist traffic through the project in a manner that provides safety for the traveling public, workmen, and equipment while imposing minimal interruption of the work. When applying chip seal to arterial roads and intersection, lanes shall be coned off for safety and traffic control during daylight hours.

2.33.6.4. Safety precautions shall be used at all times during progress of the work. Workmen shall be equipped as required by the Manual on Uniform Traffic Control Devices.

2.33.7. **METHOD OF MEASUREMENT AND BASIS OF PAYMENT** - Preservation Chip Seal shall be measured and paid for by the square yard. Unless deviations from plans or errors are observed, planned quantities will be used and no actual measurement will be taken of completed work.

The amount of completed work as described above shall be paid for at the contract unit price bid per square yard. Prices shall be considered full compensation for furnishing all labor, equipment, materials, and insurance required for the project.

A copy of all tickets for material and oil shall be given to the County for proper accountability and billing procedures.

2.33.8. **PROJECT DEDUCTION** - Description for deduct for the performance of 3/8" Preservation Chip Seal Treatment using **Boone County's existing stockpile of trap rock:**

- Deduct will apply to item: 3.8.1. *3/8" Preservation Chip Seal Treatment*
- Requirements for work for this item will be the same as that for 3/8" Preservation Chip Seal Treatment, except that contractor will use existing stockpile of Iron Mountain Trap Rock located at 5501 North Oakland Gravel Rd. (Boone County Maintenance Facility).
- Bidders will have the opportunity to examine stockpile and may perform gradation testing on this aggregate for bidding purposes if so desired. Please contact Project Manager to arrange for time to access stockpile.
- Contractor will be required to submit separate design formula (including gradation testing) for work performed with this aggregate from that of bid item 3/8" Preservation Chip Seal.
- It is estimated there is approximately 2,000 tons of Iron Mountain Trap Rock in existing stockpile.
- County may choose to use this bid item in any quantity County desires, but will notify Contractor of intent of use prior to beginning work so Contractor will have opportunity to make material for item 3/8" Preservation Chip Seal, to be used for remaining work available
- This item will only be available for use on Boone County work, not for use of any other entity.
