

Boone County Road & Bridge Annual Report

A cooperative effort between the Engineering Division of Resource Management and Road & Bridge

Vision Statement

All citizens of Boone County Benefit from a safe, modern and well maintained transportation system which results in a high level of trust and confidence placed in Boone County Road and Bridge & Boone County Resource Management—Engineering Division.

Letter from the Chief Engineer

Dear Boone County Commissioners and Boone County Residents,

The Boone County Resource Management— Engineering Division is pleased to present our Annual Report which highlights major activities and accomplishments for fiscal year 2019. Our mission is to maintain and improve the County's 771 mile road network and associated drainage structures. We remain confident that our proactive approach and data-driven programs are the core reasons for our success.

The dedication of our employees and their ability to communicate and coordinate with each other and with the Road and Bridge employees is the key to our accomplishments. Together, we will continue to provide a safe, modern and well maintained transportation system while serving the citizens of Boone County with excellence and integrity.

Thank you for the continued support and the opportunity to serve

Respectfully,

Jeff McCann, P.E.

- ♦ 2019 Infrastructure Preservation & Rehab funding level increased for the El Chaparral concrete rehab project.
- 2020 Infrastructure Preservation & Rehab funding level increased for County participation in the replacement the I-70 bridge at Rocheport.

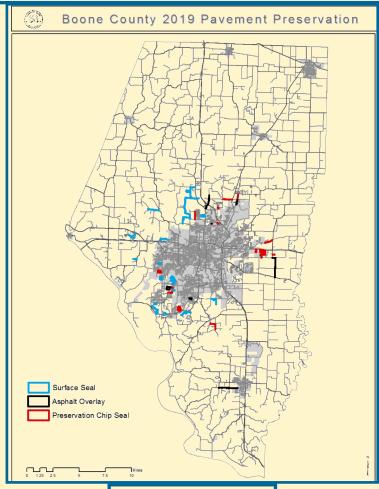

FY2019 Expenses

Pavement Preservation

The systematic process of applying the

- Right Treatment to the
- Right Road at the
- Right Time

PROJECT INFORMATION SHEET

Asphalt Overlay

Project Location:

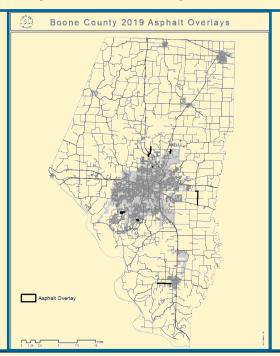

Various roads within Boone County: 7.6 total centerline miles

Project Overview:

Preventative maintenance typically applying 2" of new asphalt mix to roads showing moderate distress

Project Explanation:

Asphalt Overlays are performed on roads that exhibit some moderate distresses and smoothness irregularities, but otherwise are in good condition.

Asphalt Overlay

- ♦ 7.6 Centerline Miles
- ♦ \$1,064,074.56 Total Contracted Cost
- ♦ \$140,009.81 Contracted Cost per Mile

PROJECT INFORMATION SHEET

Onyx Surface Seal

Project Location:

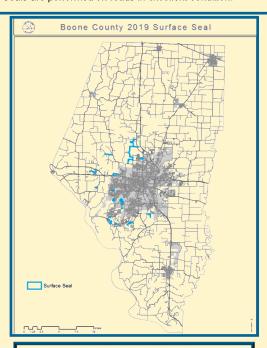

Various roads within Boone County: 35.6 total centerline miles planned; 21.9 total centerline miles completed.

Project Overview:

Preventative maintenance applying an asphalt-based sealant. A late start combined with unusual weather patterns caused this project to be suspended in late fall. The remaining 13.7 centerline miles are scheduled for treatment in the spring of 2020.

Project Explanation:

Surface Seals are performed on roads in excellent condition.

Onyx Surface Seal

- ♦ 21.9 Centerline Miles
- ♦ \$360,932.47 Total Contracted Cost
- ♦ \$16,480.93 Contracted Cost per Mile

PROJECT INFORMATION SHEET

Preservation Chip Seal

Project Location:

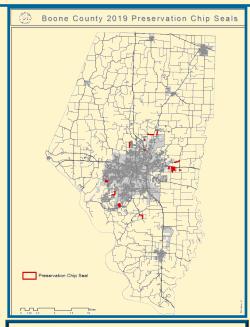

Various roads within Boone County: 13.5 total centerline miles

Project Overview:

Preventative maintenance applying a combination of rock chips and an asphalt emulsion oil to recently overlaid or constructed roads.

Project Explanation:

Preservation Chip Seals are performed on roads in excellent condition – typically within 2-3 years of being constructed or receiving an asphalt overlay. The heavy application of asphalt emulsion oil that is applied as part of a chip seal creates a very robust barrier between the pavement and the environment, limiting the deteriorating effects of sunlight and moisture to the road. The chips used in this process (Iron Mountain Trap Rock) are a very hard, durable rock which provides a wearing surface and traction to the road.

Preservation Chip Seal

- ♦ 13.5 Centerline Miles
- ♦ \$396,471.58 Total Contracted Cost
- ♦ \$29,368.27 Contracted Cost per Mile

Asphalt Rehabilitation

In late summer of 2017, when planning began for the FY2018 budget, no projects met the criteria for development of an asphalt rehabilitation project. Based on that knowledge, Resource Management Engineering prepared a work plan that included additional spending on concrete and bridge projects that met requirements in those classifications. The Boone County Commission accepted our recommendation to redistribute funds typically used for asphalt rehabilitation to concrete and bridge rehabilitation projects for budget construction years 2018 through 2022. To date, there have been no developments that would alter this plan.

Chip Seal

Later in this report you will see two types of chip seal referenced. This is an explanation of their different uses.

Limestone Chip Seal is a surface treatment consisting of a heavy application of emulsified road oil and limestone chips. They are performed as a routine maintenance activity on gravel roads that have previously had a limestone chip seal performed on them. The treatment is reapplied approximately every 4 years to maintain the integrity of the previous investment. Many years ago, these treatments were used on gravel roads as an interim dust control method and/or to control erosion of gravel road segments with steep hills. In recent years, the aggregate has been changed to river rock for increased durability. The name "Limestone Chip Seal" is now a bit of a misnomer.

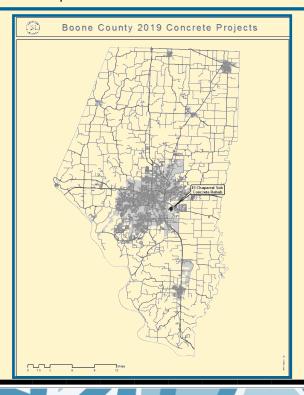

Preservation Chip Seal is a surface treatment using Iron Mountain Trap Rock, a very hard and durable rock, that provides a wearing surface and traction. The heavy application of asphalt emulsion oil, that is the other ingredient in this process creates a very robust barrier between the pavement and the environment, limiting the deteriorating effects of sunlight and moisture.

Concrete Pavement Management

The management of concrete roads is much different than asphalt roads. Concrete roads are a rigid pavement that tend to stay in good condition for a long time, then fail very quickly. Due to the properties of the material, the idea of low-cost, preventative maintenance treatments is not applicable. In prior years Boone County's management of its concrete roads focused on the systematic replacement of failed panels through either targeted panel replacements (individual panels in many locations) or rehab projects (numerous panels concentrated in a single area). Rehab projects consist of the removal of existing concrete pavement and replacement with full depth asphalt pavement. Conversion from concrete to asphalt allows those road segments to be included in our asphalt pavement preservation program.

Bi-annually, Boone County Resource Management staff inspect and rate each individual panel making up the concrete roadways of the Boone County network. Each panel is mapped and given a rating of "Good", "Damaged", or "Replace." Staff analyzes this data to determine the best repair strategy, spot repair or complete removal and replacement.

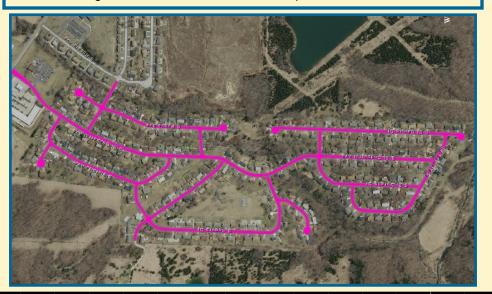

2019 Highlight Project Recap

El Chaparral Subdivision Street Rehab

As of 2018, the El Chaparral subdivision had approximately 40% of its concrete panels labeled as "Damaged" and 12% labeled as "Replace." Numbers of "Damaged" and "Replace" panels at this level indicate that spot repairs, or only replacing what needs to be replaced, will not improve the overall condition of the road and therefore may not be the best use of resources. El Chaparral has undergone several spot repair operations over the years, yet was still less than 50% "Good." It was decided the best long-term solution would be to remove and replace the streets of El Chaparral through a street rehab project.

Traditionally, the County has dedicated funds for an annual rehab project of roughly 10,000 square yards of pavement, or \$1 million. The El Chaparral project was approximately 53,000 square yards. Using traditional funding levels and methods, construction in El Chaparral would have been 4-6 separate projects taking 4-6 years. Effecting the residents for that length of time, as well as the possibility of different contractors and fluctuating prices for material and labor quickly became problematic. County staff requested, and the County Commission approved, additional funding so El Chaparral could be bid as a single project. The goal of having one project was to hopefully realize an economy of scale, provide a more consistent final product and disrupt the daily lives of the neighborhood residents for a shorter period of time..

2019 Highlight Project Recap

El Chaparral Subdivision Street Rehab

How to deal with a project of this size became an important focal point during discussions in the early planning stage. Looking at the contractor's time to complete past rehabs, it appeared El Chaparral would take at least two construction seasons. Normally, when the County bids a project we give a specific number of days allowed to complete the work. Since every potential contractor has different resources and strategies, choosing a one-size-fits-all contract time seemed dubious for El Chaparral, given the County's goal of delivering a timely and economic project. Therefore, the decision was made to require contractors to submit their own number of working days as part of the bid with a cap of 260 working days (roughly two seasons). County staff created an equation to evaluate the different costs and timelines of the bids to help determine the best value.

After the bids were opened, Emery Sapp & Sons, Inc. submitted the bid with the lowest cost at \$3,295,071.55, and the lowest number of working days at 80 working days. The results of the bidding were viewed as a win-win with cautious optimism., given 80 working days seemed a very aggressive schedule.

Streets in the El Chaparral Subdivision prior to the construction project

2019 El Chaparral Subdivision Street Rehab

Construction began in late April 2019. Progress in the beginning was slow due to bouts of wet weather. However, as the weather began to dry, progress hastened. Like most construction projects, issues did arise requiring additional attention and money. The most frequent issue was the underlying soil being weaker than anticipated in localized areas. These spots were handled by removing more of the soil and installing a thicker base rock section than what was designed. Even with these difficulties the contractor was able to keep production high and finished the project ahead of the scheduled 80 days.

Various areas within El Chaparral Subdivision

2019 El Chaparral Subdivision Street Rehab

The new roads of El Chaparral consist of a thick base rock layer and a standard 8" thick asphalt pavement. Asphalt pavement was selected for many reasons. The two most important in this instance are:

- 1) Speed of installation and reduced time until pavement can be opened to traffic.
- Asphalt has many quick and inexpensive treatment options to keep a good pavement in good condition, such as crack fillers, surface seals, chip seals, and mill & overlay.

Both are very important when working in an established neighborhood where there is a desire to keep inconvenience to the residents minimal.

Tracking the pavement's condition and applying these treatments is called pavement preservation. The County has had an asphalt pavement preservation program in place for approximately 8 years, and El Chaparral will now be part of this program. Lastly, asphalt has value in being one of the most recycled materials, both on and offsite, meaning if the pavement condition does deteriorate beyond the scope of pavement preservation treatments, options exist such as Hot In Place Recycling, Cold In Place Recycling, or Full Depth Reclamation to turn the existing pavement to a like new pavement without leaving the site. If the asphalt is removed and taken back to an asphalt plant, the millings can be incorporated into new pavement elsewhere. In fact, the mixes used in El Chaparral were 20% recycled asphalt pavement. All these factors combined make asphalt an attractive long-term investment.

El Chaparral Street Rehab Project			
Total Project Budget	\$4,250,000.00		
Final Contract Amount/Cost	\$3,374,253.59		
Actual Project Savings Realized	\$875,746.41

Drainage Structures

Drainage Structures

PROJECT INFORMATION SHEET

Dripping Springs Road Bridge Replacement

Project Location:

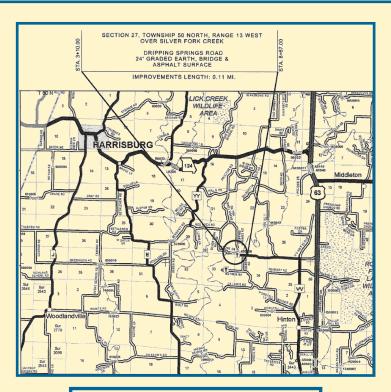

On Dripping Springs Road just north of the intersection with Stone Drive.

Project Overview:

Construction of a 124 foot long, concrete deck on precast concrete girder span bridge.

Project Explanation:

Replaces deficient, load restricted span bridge constructed in 1977.

Dripping Springs Bridge Replacement construction cost \$545,729.36

Drainage Structures

PROJECT INFORMATION SHEET

East St. Charles Road Bridge Replacement

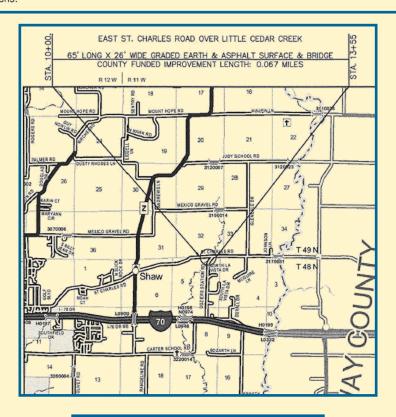

Project Location:

On East St. Charles Road just west of the intersection with Dozier's Station Road.

Project Overview:

Construction of a 65 foot long, concrete deck on steel girder, span bridge.

Project Explanation:
Replaces deficient, multi-barrel culvert structure to provide better flow characteristicts and catch less

E St. Charles Bridge Replacement construction cost \$339,698.45

Requirement #2

Submit a plan for construction, reconstruction, maintenance and repair of existing established public highways, roads, bridges, and culverts proposed to be undertaken and completed during the current year.

Insurance Activity	20,000
CART/MV Distribution to Road District	87,000
Other	194,188
Total Expenditures	\$ 21,010,134
Total Other Financing Uses	<u>-</u>
Total Financial Uses	\$ 21,010,134

Asphalt Rehabilitation Projects

There are currently no asphalt rehabilitation projects under consideration

Capital Improvement Projects

There are currently no capital improvement projects under consideration

Concrete Rehabilitation Projects

There are no current plans for individual panel replacements.

Boone Industrial Rehabilitation is in the final design-easement acquisition phase and planned for construction in 2020.

Drainage Structure Projects

Olivet Road Bridge #BR3410003 and Hartsburg Bottom Road Bridge #BR4010004 are in the conceptual planning-preliminary design phase, and planned for construction in 2021.

New Haven Road Bridge #BR3430024 & Water's Edge Stormwater Improvements Phase II are in the final design-easement acquisition phase and planned for construction in 2020.

Bass Lane culvert replacement final design plans are complete and proposed to be replaced by the Road and Bridge Department in 2020.

Pavement Preservation Projects

These projects are currently under design and proposed to be constructed in 2020:

- ♦ 63,350 sq. yds. of Asphalt Overlay
- ♦ 288,300 sq. yds. of Preservation Chip Seal
 - ♦ 415,800 sq. yds. of Surface Seal

Requirement #3

Report the general condition of all established public highways, roads, bridges and culverts in the county.

Fiscal Year 2019 Condition

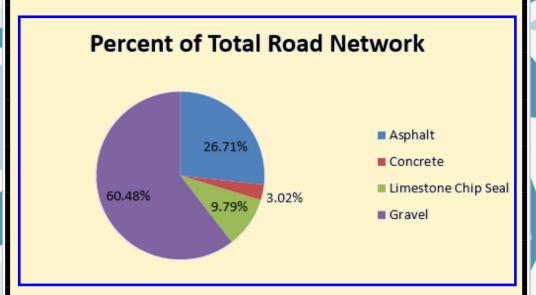

The following charts are based on information stored in Cartegraph, the County's database program. These values are for only non-retired roads that are currently maintained by Boone County. Roads that are partially owned by the County but not maintained by the County are not considered in these values. The categories are also based on surface types, with the exception of Preservation Chip Seal, which is considered the same as an asphalt surface and is therefore included in the Asphalt category in these stats.

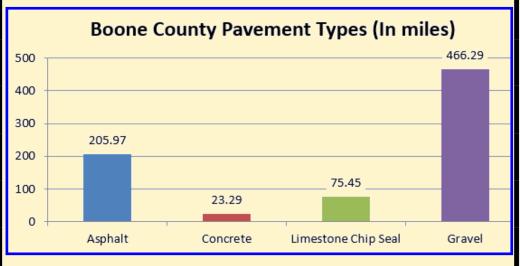

Surface Type	Total Miles	Percent of Total Road Network	Change in Total Miles from 2018
Asphalt	205.97	26.71%	+2.47
Concrete	23.29	3.02%	-3.21
Limestone Chip Seal	75.45	9.79%	+1.75
Gravel	466.29	60.48%	51
Total	771.0	100%	+.5

**Total miles of county maintained road changes due to: acceptance of new roads built by someone other than Boone County, annexations, change of surface type (asphalt over concrete roads), our new maintenance agreement with the City of Columbia for roads that are accessed by both County and City properties and error corrections.

Total Miles of Road Maintained by Boone County

2019 Asphalt Surface Ratings

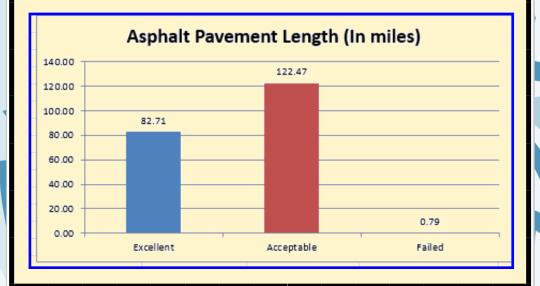

Records pertaining to asphalt roads are identified by segment, from one specific point to another. Information used to assign scores for each asphalt road segment is obtained using several different methods. Boone County uses 1) visual inspection of a segment, 2) work performed on a segment and 3) weighted averages for normal use of a segment. These assessments are entered in Cartegraph where they are combined to generate the grade or condition of each segment based on established curves. The following values are used for the classes:

OCI = Overall Condition Index

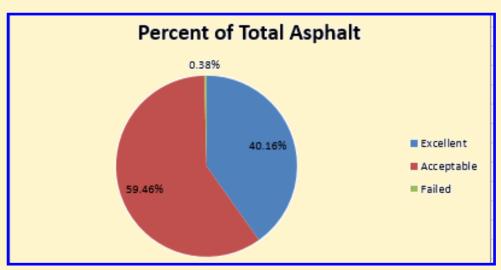

Excellent = any value 85 and above

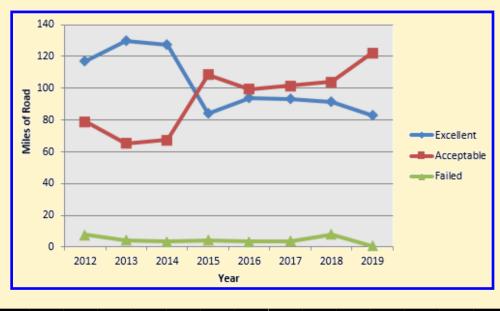

Acceptable = any value between 55 and 85

Failed = anything less than 55

2019 Asphalt Surface Ratings & Asphalt Rating Comparison 2012-2019

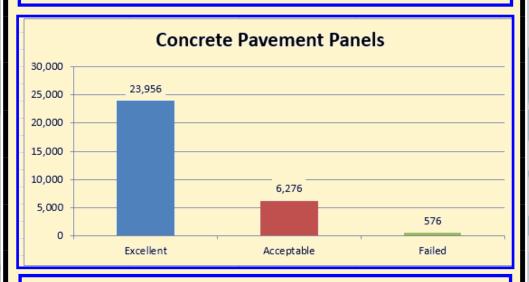

2019 Concrete Panel Ratings

Concrete roads are a rigid or non-flexible pavement and cannot be evaluated using the same criteria used for asphalt roads. Concrete roads are inspected by each individual panel. The ratings in these graphs are based on panels in each category, and not in road miles.

Excellent = panel has no damage

Acceptable = panel has minor damage

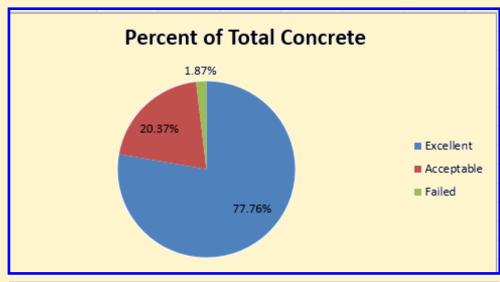

Failed = panel needs to be replaced

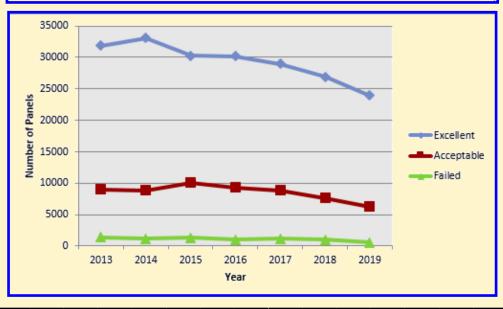

Flexible vs Rigid Pavement

Both flexible and rigid pavements are composed of fine aggregate, coarse aggregate, and a binder. In flexible pavements the binder is generally a bituminous asphalt type material. In rigid pavements the binder is generally a Portland cement type material. The job of both binders is to 'bind' the other ingredients together. As the name suggests, flexible pavements are designed to flex a certain amount as load is applied to it and share its load with a base material designed for that purpose. Rigid pavements are designed to remain rigid and spread the load over a larger area.

2019 Concrete Panel Ratings & Concrete Panel Rating Comparison 2013-2019

2019 Gravel Roads & 2019 Limestone Chip Seal Roads

2019 Bridge Ratings

Many types of structures are referred to as bridges. However, only bridges that meet the minimum size requirement of 20 feet in length are inspected by MoDOT. The ratings and figures provided on the next pages are based on material obtained from MoDOT inspections, and only refer to bridges inspected by MoDOT. State inspections are performed every other year with the most recent inspections completed in 2019.

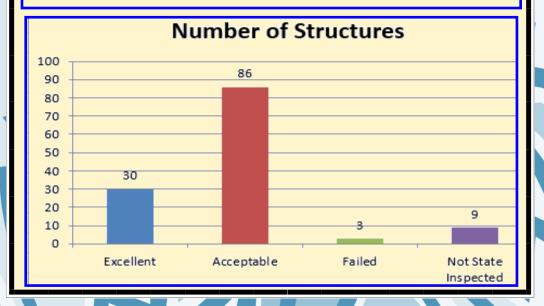

From the MoDOT inspections, the deck condition, substructure condition, and superstructure condition are rolled into an average value based on a 0—100 scale. Cartegraph generates the bridge rating value. The standards listed below are used for the rankings:

Excellent is an OCI of 75 and above

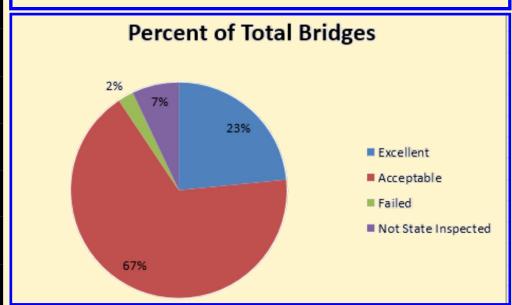

Acceptable is an OCI between 50 and 75

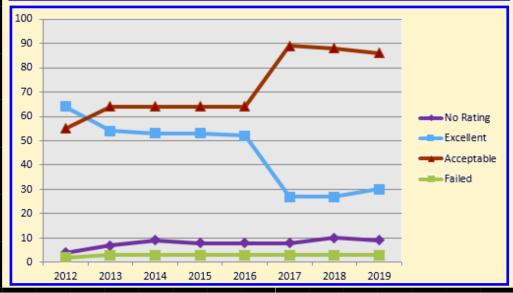

Failed is an OCI less than 50

OCI = Overall Condition Index

2019 Bridge Ratings & Bridge Rating Comparison 2012-2019

Additional Duties

- **♦** Surveying
- **♦ Right of Way**
- **♦ Stormwater**
- **♦ Sales Tax Distribution**

Fiscal Year 2019

Additional Responsibilities 2019 Surveying

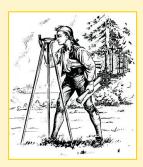

Assistance to County Staff

- * Assisted Road and Bridge Maintenance and Operations personnel by providing a variety of surveying services and right-of-way and easement information as necessary.
- * Assembled topographic data for the preparation of plans for projects.
- * Assisted right-of way personnel by staking easements (both temporary and permanent) for reviewing proposed plans, and assisting them when meeting and negotiating with property owners on proposed projects. At times, accompanying right-of-way personnel to those meetings.
- * Assisted Planning & Building Inspections Departments with complete reviews of all plats of proposed Subdivisions and Administrative Surveys, submitting comments and suggestions to the Planning Department, and notifying the surveyors of those comments and suggestions. Additionally, all descriptions for granting easements for public roadways and for utilities were reviewed. (these are required when preparing many of the administrative surveys)

Additional Responsibilities 2019 Surveying

Assistance to the Public

- * Represented Boone County Road and Bridge at concept reviews held by the Boone County Planning Department for review of upcoming developments.
- * Responded to the many requests that Boone County receives from property owners, title companies, realtors, other governmental agencies, surveyors and engineers, and others regarding existing road rights-of-way.
- * Responded to 4 inquiries for NID's. None, to date, have applied for County assistance.
- * Completed placing permanent monuments in the position of selected corners of the Public Land Survey System (Section and 4 Section Corners) as part of the Missouri Department of Agriculture County Surveyor Co-op Program. The County was paid \$300 per corner.

Additional Responsibilities 2019 Right of Way

In addition to the preservation and improvement of Boone County roads and bridges, another task shared by Resource Management Engineering Division and Road and Bridge is the maintenance of Boone County Right of Way. The County's priority is to ensure proper site distance and drainage on County roadways. A few of the tools employed in the upkeep of Boone County Right of Ways are:

Right of Way Permits are issued when excavation takes place in a Boone County owned or maintained right-of-way. Excavation in this context is defined as work that results in the alteration or damage of the road surface, drainage ditches, curbs and gutters or other drainage structures, traffic control devices, or county maintained pedestrian walkways within the road right-of-way. Excavation also includes actions which physically undermine the structural integrity of the road base, road drainage, traffic control devices, or pedestrian walkways within the right-of-way. 51 Right-of-Way permits were issued and inspected in 2019.

Driveway Permits are issued for new or upgraded driveways that are connected to a County maintained road. Some types of upgrades that require a permit are: converting an existing gravel driveway to a paved surface, resurfacing an existing driveway, installing a larger culvert, and widening a driveway. 121 Driveway permits were issued and inspected in 2019.

Additional Responsibilities 2019 Right of Way

Adopt-A-Road: the purpose of the adopt-a-road program is to promote citizen involvement and participation in improving our environment and preserving the natural beauty of Boone County roadways. Volunteers help maintain attractive roadsides by picking up litter along Boone County roadways. Below is the list of the current adoptions:

Road Name	Organization Name
Rangeline Road	OTSCON, Inc.
Creasy Springs Road	Momma T's Family
Dodd Road	Dodd Road Beautification
St Charles Road	Wettershaw Manor
Nebo Cemetery Road	Friends of Hugh Hodler
Crump & Martin Lanes	Ashland FFA
David Allen Road	David Allen Road Neighborhood
Easley River Road	Missouri River Relief
Gans Road	The Horses of Gans
Gillespie Bridge Road	Friends of Gillespie Bridge Road
Glendale Drive	Two Mile Prairie Neighbors
Judy School Road	Two Mile Prairie Neighbors
Mauller Road	Friends of Mauller Road
Obermiller Road	Boone County Republican Party
Old Highway 63 South	Ashland United Methodist Church
Old Plank Road	The River Folk of Cooper's Landing
Rock Quarry Road	Range Free Bakery & Cafe
McQuitty Lane	Hootie Hill Farms
Olden Road	To Honor Roscoe & Lucreta Olden (by Brenda & Mark Rowland)
Rowland Road	To Honor Newt & Beulah Rowland (by Brenda & Mark Rowland)

Boone County Stormwater Mission Statement

Establish stormwater management requirements and controls to enhance and protect water quality, reduce stormwater pollutant runoff, and protect and safeguard the general health, safety, and welfare of the public residing in watersheds within Boone County.

What is stormwater?

Stormwater is any water coming from precipitation. It may be rain, water from snowmelt, or water that runs off streets, parking lots, lawns, and other surfaces. Stormwater drains into natural or manmade drainage systems, such as ditches and storm sewer inlets. Neither the natural, nor the manmade drainage ways connect to the wastewater treatment plant; instead, the water is discharged directly to our streams and rivers.

What is Boone County doing to address stormwater runoff?

Boone County is jointly permitted with the City of Columbia and University of Missouri in accordance with the Stormwater Phase II Final Rule requirements specified in section 4.1.4 of the site-specific permit MO-0136557 for discharges from small regulated Municipal Separate Storm Sewer Systems (MS4s), as well as per state regulation 10 CSR 20-6.200 and federal

What is Boone County doing to address stormwater runoff? Continued

regulations 40 CFR Parts 9 and 122. To fulfill its permit requirements, Boone County has implemented six (6) Minimum Control Measures (MCM), which are expected to help significantly reduce pollutants into receiving waterbodies. These MCM's cover public education and outreach, public involvement, illicit discharge detection and elimination, construction site stormwater runoff control, post-construction stormwater management in new development and redevelopment, and pollution prevention/good housekeeping for municipal operations.

On the following pages your will see the activities Boone County Stormwater participated in during 2019 as we worked to address stormwater runoff and achieve our mission.

As you read you will see many references to Enviroscape and stream table. The stream table is shown in the photo to the left, and gives an interactive view of how streams function in the natural environment. The Enviroscape is a similar tool that shows how pollution travels through the environment.

Public Education and Participation:

- ♦ Guest Speaker: Hallsville 4-H: Boone County Stormwater presented to the Hallsville 4-H club about stormwater and watersheds. Attendees completed the "Who Polluted the Stream" activity and discussed what could be done to prevent stormwater pollution.
- ♦ Ashland FFA: Boone County Stormwater presented the "Who Polluted the Stream" activity. Students drew and wrote about how they could clean streams and what could be done to prevent pollution from reaching streams.
- ♦ Southern Boone 2nd Grade: The Stormwater Educator and Coordinator lead a presentation over how streams form and function using the stream table. Students also took part in an interactive activity to show how humans affect waterways and what can be done to improve water quality.
- ◆ Columbia Kindergarten
 Classes: The Stormwater
 Educator visited 27
 Columbia Public School
 kindergarten classrooms,
 using the Enviroscape to
 show different sources of
 pollution and how rain can
 carry them into our
 waterways, and showing what
 actions can be taken to
 prevent pollution.

- ♦ Guest Speaker: Centralia 5th Grade: The Stormwater Educator spent the day presenting about stream pollution sources. The students then created a "solution to the pollution."
- ♦ Southern Boone FFA: Amy Meier from Missouri Stream Team gave a lesson over macroinvertebrates and how bugs reflect water quality, preparing them for a Stream Team water quality testing event held later in the spring.
- ♦ Columbia Young Scientists Expo: Boone County Stormwater hosted a booth at the CYS Expo. The booth had a display focusing on stormwater, water quality testing, and karst topography. The Enviroscape was used to show different sources of pollution and how rain can carry them into our waterways.
- ♦ Boone County Soil & Water Conservation District's Cover Crops Workshop: The Urban Hydrologist hosted a booth about the Greater Bonne Femme project at this workshop, where attendees could learn more about the project and water quality in Boone County.
- ♦ Guest Lecturer: Moberly Area Community College: The Stormwater Coordinator guest lectured for the Conservation Biology Class at the MACC Columbia campus, focusing on the history of stormwater and stormwater in Boone County.

- ◆ Engineer and Contractor's Lunch and Learn:
 Procedures for Working in Karst Topography: Boone
 County's Chief Engineer presented on Boone County's
 stormwater ordinance requirements for engineering
 and building in environmentally sensitive areas,
 clarifying stream buffer zones, stormwater
 management, and erosion control requirements. The
 county's Urban Hydrologist presented about how karst
 topography found in the county influences our
 streams and watersheds, and how our ordinances help
 protect these sensitive environments.
- ♦ Engineer and Contractor's Lunch and Learn: Karst Topography and its Impact on Construction: Eric Lindholm P.E, a local engineer with Crockett Geotechnical Testing Lab, gave a geologic background and several case histories of "new" sinkholes and their impact on projects under construction.
- ♦ Greater Bonne Femme Watershed Land Management
 Workshop Spring: property owners within the
 Greater Bonne Femme Watershed attended the all-day
 workshop. They learned about the pre-history of the
 area, history of water quality monitoring in the
 watershed, conservation easements, importance/
 establishment of native plants, forest management,
 cost-share availability, services available from
 University Extension, DIY BMPs, and how to identify
 and treat invasive plants.
- ◆ Guest Presenter: Mid-MO Expo: Small Farm to Backyard Garden: The Urban Hydrologist presented at the Mid-Mo Expo.

- ♦ The Incredible Missouri River Event at the Daniel
 Boone Regional Library: Boone County partnered with
 Missouri River Relief to host a program focusing on
 watersheds, stormwater, and the Missouri River.
 People who attended had the opportunity to see how
 water shapes a stream by using the stream table and
 had a chance to touch a boat.
- ♦ Guest Presenter: Ashland Learning Garden: Over two days, the educator gave presentations explaining stormwater and watersheds, completing the "Who Polluted the Stream" activity.
- ◆ Earth Day: Boone County Stormwater presented an interactive participation activity using the Boone County stream table at the annual Earth Day celebration on ECO Avenue, demonstrating the effects of watershed erosion, pollution, and civic responsibility. A second booth featured ongoing projects in the Greater Bonne Femme Watershed.
- ◆ Ashland Learning Garden: A Day at the Stream: 5thgrade students from Southern Boone County R-1 attended the "A Day at the Stream" at Harts Creek in Hartsburg. Students went on a native plant/erosion nature walk, tested stream velocity and talked about stream dynamics, learned about macroinvertebrates as indicator species for water quality, and performed a dissolved oxygen test on a water sample.

- ♦ Missouri River Days: The Stormwater Educator aided Missouri River Relief in taking 4th graders from Columbia Public Schools on the Missouri River.
- ♦ Centralia R-VI 6th Grade: Boone County Stormwater presented a 4-day program

- using the stream table to teach stream functions and formation and leading an activity on watershed practices and civic responsibility. This program served 6th grade students.
- ♦ Guest Presenter: Missouri Master Naturalists: The Urban Hydrologist gave a presentation about the water quality in Boone County to the local Missouri Master Naturalists chapter.
- ♦ West Middle School 3M Wetland Tour: The Urban Hydrologist and Stormwater Educator aided the City of Columbia's Stormwater Educator, facilitating a day at the 3M Wetlands located alongside Hinkson Creek. Students were divided into different groups and rotated through 4 activities.
- ♦ Columbia Home Educators 3M Wetland Tour: Members of the Columbia Home Educators Club came to the 3M Wetlands to learn about managing stormwater and methods to improve the water quality of our local streams. Students learned about the creation of different types of wetlands and how they function.

- ♦ Cruise the Creeks: Riders enjoyed an educational bike ride along the MKT trail, highlighting the City of Columbia's efforts to improve water quality in the Flat Branch/Hinkson Creek watersheds. The tour was led by the City of Columbia and Boone County's Stormwater Educators and Boone County's Urban Hydrologist.
- ♦ Guest Presenter: Earth Keeper Kids: This event was held at the 3M Wetlands, and used the Enviroscape to show runoff pollution from nonpoint sources and different methods for stream pollution reduction practices. Visitors also learned about constructed wetlands, the different parts of the 3M Wetlands and how they work.
- ♦ Southern Boone Middle School 3M Wetland Tour:
 Southern Boone County 6th and 7th-grade summer school classes visited the 3M Wetlands to learn about stormwater management and improving water quality of local streams. The students learned about wetland construction and how wetlands function.
- ♦ STEMette Summer program: Boone County Stormwater,

the City of Columbia, and the University of Missouri worked in partnership teaching about watersheds and water quality testing techniques. Students were given a challenge to design and build a device to remove pollutants from the water.

- ♦ Boone Electric Annual Meeting: The Boone County Stormwater Educator supplied an informational booth on the county's stormwater program and provided interactive activities for the attendees and their children. The Urban Hydrologist provided information about the Greater Boone Femme Project.
- ♦ Rock Bridge Memorial
 State Park Water
 Festival: Boone County
 Stormwater took part in
 the 5th annual Water
 Festival at Rock Bridge
 Memorial State Park.
- ♦ Guest Speaker: City of Columbia Energy and Environment Commission:

The Urban Hydrologist and Stormwater Coordinator attended the August Energy and Environment Commission meeting, and the Urban Hydrologist gave a presentation about stormwater runoff into creeks in Columbia.

- ♦ Job Point/Youth Build: Boone County Stormwater assisted Missouri River Relief with a field day on the Missouri River for Job Corps and Youth Build. The stream table was used to show stream function and erosion processes.
- ♦ Leadership Training for 4-H: The Stormwater Educator was a guest speaker during the Ashland 4-H officer's leadership training and talked about stormwater stewardship and how students can have a positive impact on watersheds.

- ♦ Sturgeon Soil Science Class: The high school soil science students created models showing soil compaction and how different types of soil and structure have an impact on infiltration and runoff rates.
- ♦ Snowpalooza: The Stormwater Educator presented during the City of Columbia's Public Works educational event regarding the impact of road salt on our waterways.
- ♦ Guest Panelist: MU School of Natural Resources
 Aquatic Ecology: The Urban Hydrologist was a guest
 panelist for a presentation on aquatic ecology in
 the University of Missouri's School of Natural
 Resources.
- ♦ Watershed BINGO: The Stormwater Educator hosted a Watershed BINGO at the Southern Boone Library, highlighting the Greater Bonne Femme Watershed and stormwater best management practices.
- ♦ Greater Bonne Femme Watershed Land Management
 Workshop-Fall: property owners attended an all-day
 workshop focusing on Soil Health. The topics included cover crops, wildlife food plot management, pest
 control, conservation easements, and soil diversity.

Through these programs the Boone County Stormwater team members were able to have direct contact with over **3400** Boone County Residents!

Public Involvement Opportunities

- ◆ First Day Hike on Deer Run Trail at Rock Bridge Memorial State Park
- ◆ Farm and Fiddle Radio Show to discuss water quality monitoring at Rock Bridge Memorial State Park
- ♦ 2 KFRU Boone Femme Watershed Project Discussions
- ♦ Water Quality Monitoring on Jemerson Creek with Ashland FFA
- ♦ 3 Storm Drain Marking Events in Ashland
- ♦ 2 Rock Bridge Renew Clean Up Events
- ◆ 2 Rock Bridge Memorial State Park Water Quality Monitoring Events
- ♦ Area-wide Household Hazardous Waste Collection
- ♦ Audubon Nature Walk on Grindstone Trail
- ◆ Audubon Nature Walk in Capen Park/Greenbelt Land Trust nature preserve
- ◆ Spring Brook Trail Hike at Rock Bridge Memorial State Park
- ♦ 7 Rock Bridge Memorial State Park Interpretive Tours

Training Opportunities for County Staff

- ♦ Webinars: several webinars hosted by EPA, USDA, Source Molecular, AWRA, RCPP and US Fish & Wildlife covering a wide range of topics such as Water Related Terrorism, Water Quality Modeling, Harmful Algal Blooms & Algal Toxin Treatment, etc.
- ◆ Special Handling Training: The Urban Hydrologist and Educator attend a workshop illustrating how to handle illegal and/or dangerous materials that can be found while leading Stream Team cleanups.
- ◆ Burn Workshop: The Stormwater Educator attended a workshop about how to plan and execute a controlled burn.
- ◆ Mid-MO Soil Health Seminar: The Stormwater Coordinator, Educator, and Urban Hydrologist attended this 2-day seminar in Boonville learning about cover crops and grazing techniques to improve water quality.
- ◆ LMVP Sampling Training: The Stormwater Educator and Coordinator were taught the proper method for collecting and processing samples for the Lake Monitoring Volunteer Program.
- ◆ Mental Health First Aid: The Stormwater Educator attended this workshop to learn how to identify, understand, and respond to signs of mental illness and substance abuse disorders.

- ◆ Project WET and Aquatic WILD: The Stormwater Educator attended this training focusing on science education methods and water education curriculum for teachers to explain water resources to youth.
- ♦ Boone County Wellness Fair: Boone County Stormwater presented an interactive participation activity using the Boone County Enviroscape to show the effects of watershed erosion, pollution, and civic responsibility to approximately 80 employees and their family members.
- ◆ Rock Bridge Memorial State Park Cave Institute: The Stormwater Educator is a member of the Cave Institute, learning about the interaction of surface water and karst topography, cave animals, water quality testing, mapping cave passages, and finding answers to other questions about this fascinating underground world.
- ♦ REGFORM: Stormwater staff attended Missouri REGFORM to learn about EPA stormwater rulings and other stormwater-related topics.
- ◆ Boone County Soil & Water Conservation District Pasture Walk: The Stormwater Educator and Urban Hydrologist attended a pasture walk at a farm in Boone County.

- ♦ Boone County Family Fun Day: The Stormwater Educator hosted a mural painting activity, facilitating the discussion of human impact on water bodies and aquatic life. Approximately 25 employees and their family members contributed to the painting
- ♦ MWEA: Stormwater staff attended MWEA in September to learn about stormwater practices and stormwater-related topics currently in use throughout the state.
- ◆ NAAEE Conference: The Stormwater Educator attended the annual North American Association for Environmental Education, which emphasized workshops about curriculum development, environmental literacy, connecting with nature, sustainable communities, link research and practice to increase impact.
- ◆ Boone County Stormwater Inspector Training: Boone County stormwater provided refresher training to nine staff members on ordinance enforcement, inspection procedures, and best management installation and maintenance requirements.
- ◆ Safety Day Boone County Road & Bridge: The Boone County Stormwater Coordinator gave a presentation on erosion and sediment control. Employees were given a chance to take part in a game and win prizes. This program served approximately 50 employees.

- ◆ MS4 Workshop: Intro to TMDLs and ARAPs; Nightingale Creek Case Study: The Stormwater Coordinator attended a workshop hosted by the Missouri Department of Natural Resources to learn about Total Maximum Daily Loads and Assumptions and Requirements Attainment Plans.
- ◆ Grow Native! Workshop: Native Plants for Pollinator Enhancement, Livestock Production & Prairie Strips within Row Crops: The Urban Hydrologist learned how incorporating natives into agricultural practices and land for recreational uses can benefit farm revenues, livestock health, pollinators, soil health, water quality, and more. The workshop also featured information on NRCS cost-share programs.
- ◆ AWRA Conference: The Boone County Urban Hydrologist attended the American Water Resources Association Conference in Salt Lake City, UT. This weeklong conference featured lessons learned from the implementation of multidisciplinary projects, best practices discovered in the design and application of water resource management, implications of water policy decisions, and research into current and emerging issues.

Continuing education is a vital tool in helping Boone County Stormwater staff educate the public with the most up-to-date information on water issues and resolutions.

Develop/Distribute Educational Materials

- ◆ Boone County Stormwater Website: www.showmeboone.com/stormwater

- ♦ Hinkson Creek Collaborative Adaptive Management Website: www.helpthehinkson.org
- ♦ Stormwater Newsletters
- ♦ Boone County Stormwater Facebook Page

Monitoring and Assessments

- ♦ Bonne Femme Watershed Project: The Bonne Femme Watershed Project is the revitalization and continuation of several projects from the past that sought to protect and conserve water quality in the Little Bonne Femme and Bonne Femme Watersheds in Boone County. In 2018, Boone County received a Chapter 319 subgrant award from the Environmental Protection Agency, through Missouri Department of Natural Resources to develop a 9-element watershed management plan for the Greater Bonne Femme Watershed. The grant period began August 1, 2018 and was scheduled to run through July 31, 2020. We will be asking for a time extension and budget increase in 2020.
- a. Technical Advisory Committee met seven times.
- b. Monitoring: Gauging Stations were set up at Turkey Creek and Hwy 63 S, Bonne Femme Creek at Nashville Church Rd, and Little Bonne Femme Creek at Woodie Proctor Rd. These stations continue to provide stage and temperature information.
- c. Quarterly stormwater sampling at ten locations
- d. E. coli testing is ongoing
- e. Cooperative Stream Investigation Project This project was completed in 2018. A final report from the Missouri Department of Natural Resources Coordinator was received in May 2019.

- ◆ Lakes of Missouri Volunteer Program (LMVP)
 Sampling: The LMVP started in 1992 as an effort to get citizens involved in the lake water quality monitoring. Staff at Boone County continued sampling at Stephens Lake, Tri City Lake, and Lick Creek Lake this season. Staff collected four (4) samples between June and September. By participating in this effort, Boone County receives free sampling equipment and information on the status of the lakes in Boone County. The goals of the LMVP are:
- a. Determine the current water quality based on productivity of Missouri's lakes,
- b. Monitor for changes in water quality over time,
- c. Educate the public about the lake ecology and water quality issues.

For more information, visit www.LMVP.org.

Boone County Stormwater Stream Team: The Boone County Stormwater Team actively participates in the Missouri Stream Teams program. In 2019, our team monitored water quality on Bonne Femme Creek, Turkey Creek, Little Bonne Femme Creek, the Devil's Icebox Spring Branch, Silver Fork Creek, Cedar Creek, and Lick Fork Creek. Normally, streams are monitored for nutrients four times per year, and macroinvertebrate sampling is conducted twice per year. Due to high precipitation and flooding conditions in 2019, stream water quality data would not have been representative so there were far fewer rounds of sampling. We hope for stream conditions to be relatively normal in the coming water year so we can resume monitoring on all our sites and a few sites as the need arises. The Stream Team data become part of the larger dataset managed by the Missouri Stream Teams program.

- ◆ Hinkson Creek Collaborative Adaptive Management: The goal of the collaborative adaptive management process is to improve water quality in Hinkson Creek by using a science based approach guided by a local stakeholder committee. It will assess the entire stream system, including the creek and other parts of the watershed. Improving the ecosystem should help support the return of the biological community to a fully functioning level as well as addressing other pollutants that may be contributing to water quality issues.
- a. Stakeholders met five (5) times.
- b. Action Team met twelve (12) times.
- c. Science Team met ten (10) times.
- d. Riparian Subcommittee met five (5) times.
- e. Habitat Assessment Physical Assessment is 100% complete. Spatial analysis is ongoing.
- f. Forum Nature Area Level Spreader Construction and monitoring are 100% Complete
- g. Evaluation of the Missouri River Backwater
 Effects 100% done
- h. Combined Flow & Suspended Sediment Study 100% Complete
- i. Fine Sediment Mapping 100% done. Data analysis is pending.

- j. Macroinvertebrate Study Ongoing
- k. Synoptic Sampling Sampling began using MU students in 2019. Funding was approved in 2019 to continue sampling for 2 additional years.
- 1. USGS Comprehensive Chemical Sampling Funding has been approved for this 1-year project. Sampling will begin in 2020.

MS4 Compliance

Joint MS4 Coordination Meetings: Stormwater staff from Boone County, City of Columbia, and MU meet each month to coordinate and work on stormwater activities. This year the committee nine (9) times.

Stormwater Fact

Road salt (sodium chloride) is a chemical most commonly used to remove ice from roads, parking lots, and sidewalks. Just one teaspoon can permanently pollute five gallons of water. As snow and ice melt, the resulting water along with rain wash the salt from the road, flushing the salt into the storm drains, and contaminating surface water bodies. The salt can even make its way down into the groundwater.

City of Ashland 2019 Annual Report

ROAD & BRIDGE ANNUAL SUMMARY REPORT

For use by all Entities (Application, Formula and Centralia Special Road District) to provide annual information in accordance with the Cooperative Agreement entered into with Boone County, Missouri (Commission Orders 459-2011 through 471-2011 approved on November 15, 2011, by the Boone County Commission).

Reporting Entity:
City of Ashland
Reporting on Calendar Year:
2019
Narrative for use of funds received
The Boone County Road and Bridge Repair Fund provided the City of Ashland with \$157,000 in 2019. This is a \$700.16 increase over the amount provided in 2018. These funds have been used on a variety of different road improvement projects throughout town, to include culvert replacement, street patching, curb and gutter repairs, and gravel road improvements.
At this time, the majority of these funds (\$117,711.51) have not yet been utilized. These funds had been earmarked for the planned project of repaving the parking stalls in the 100-200 blocks of E Broadway. Unfortunately, this project had to be delayed due to MoDot cancelling their portion of the same project (milling and asphalt paving of the same stretch of roadway (Rt M).
The only bridge currently inside Ashland city limits that is maintained by the city is in the 400 block of Sarah Dr. Unfortunately, this bridge has recently began to show serious signs of deterioration. This bridge will be replaced within the next few months. The estimated cost of this project is approximately \$120,000. We anticipate utilizing this remaining \$117,711.51 of the Boone County Road and Bridge Repair Fund for the replacement of the Sarah Dr Bridge.
Newstive on every production of reads and heidage within tenerting municipality.
Narrative on overall condition of roads and bridges within reporting municipality:
Street conditions within Ashland City Limits are overall in good shape. The sole bridge in town
maintained by the City of Ashland is in poor shape (Sarah Dr Bridge), but it will be replaced very soon.
The growth of Ashland has led to increases in roadway miles annually for the last several years. These
new streets are currently in great condition, but do require periodic maintenance. As with any growing
community, we are experiencing significant increases in commercial and residential traffic, which leads to
faster deterioration of our roadways.
Allocation and Expenditure of Funds Received listed by project, with a project description. Include only direct design and construction costs pertaining to roads, bridges and storm water; indirect and other administrative costs are not allowable. Attach extra pages as necessary.

City of Ashland 2019 Annual Report

Projects with descriptions _	
	Samuel .
The following projects were funded with the 2019 Boone County Road and Bridge Repair F	una:
Angel Lane	\$29,018.00
-Replacement of culvert beneath roadway and improvements to culvert ends 800 block S Henry Clay Blvd Repairs	\$7,747.50
-Installation of street patch with curb and gutter to repair and prevent future roadway	
undercutting and erosion of road base materials E. Loy Martin Rd	\$1,956.33
-Grading of road to remove damages/potholes, replacement of gravel on road surface	#E00 00
Hunters Bend -Grading of road to remove damages/potholes, replacement of gravel on road surface	\$566.66
The following project will funded with the 2019 Boone County Road and Bridge Repair Fun	d:
Sarah Dr Bridge Replacement	~\$120,000.00
-Replacement of bridge deck, abutments, and entrances due to severe deterioration	

ROAD & BRIDGE ANNUAL SUMMARY REPORT

Page 2

Report Summary

The projects completed thus far with funds from the Boone County Road and Bridge Repair Fund total \$39,288.49. This leaves \$117,711.51 still available of the funds received. These unexpended funds are planned to be utilized during the replacement of the Sarah Dr Bridge. The total cost of these projects is estimated at approximately \$160,000.00. The City of Ashland will pay for the remaining costs, along with several other projects, through income collected through our local transportation tax.

The City of Ashland continues to experience significant growth of both population and city footprint. At any given time, there are multiple commercial and residential developments underway. This growth is not expected to diminish anytime soon. Accordingly, we are seeing increases in traffic, both commercial and

City of Ashland 2019 Annual Report

residential throughout the city. This sustained growth and increased traffic is leading to deterioration of roadways at a much faster rate than the city has experienced in the past. We are also increasing the number of roadway miles in town rapidly by adding these developments. All of these issues lead to increases in annual roadway maintenance costs. As Ashland continues to grow, additional funding will be required each year to keep our streets in acceptable condition. Without the funds provided from the Boone County Road and Bridge Repair Fund, we would be forced to decrease the amount of projects and repairs significantly. This cooperative agreement is highly beneficia for both Ashland residents and Boone County residents, as Ashland is the hub of Southern Boone County. It allows for the timely completion of major road repairs, and leaves local transportation funding available for routine maintenance of city streets and smaller scale projects. City and county residents are able to easily recognize that both the City of Ashland and Boone County place a high priority on providing a safe and well-maintained transportation system. The City of Ashland looks forward to continued cooperation between ourselves and the County of Boone to provide exceptional services to our tax payers. TOTAL ~\$160,000 I declare that I have examined this report, including accompanying schedules and statements, and to the best of my knowledge; certify that the information provided above is true, complete and accurate. 1/27/2020 Date Signature Public Works Director Title James Creel 573-657-2568 Day Time Phone number Printed Name

Centralia Special Road District 2019 Annual Report

ROAD & BRIDGE ANNUAL SUMMARY REPORT

For use by all Entities (Application, Formula and Centralia Special Road District) to provide annual information in accordance with the Cooperative Agreement entered into with Boone County, Missouri (Commission Orders 459-2011 through 471-2011 approved on November 15, 2011, by the Boone County Commission).

Reporting Entity: Centralia Special Road District of Boone County Mo.

Reporting on Calendar Year:

Narrative for use of funds received:

Routine maintenance of roadways within the District including hauling gravel and blading of unpaved roads, replacing road pipes, cutting brush and mowing right of way as needed. Also did overlay projects on March Road and North Jefferson Street and applied concrete millings along the shoulders of Jay Jay

Narrative on overall condition of roads and bridges within reporting municipality:

The overall condition of the gravel roads in the District are considered to be in average or better condition.

The condition of the blacktop roads are average to good with about 10% of the blacktops needing to be overlayed.

The bridges are in average condition considering their age.

Allocation and Expenditure of Funds Received listed by project, with a project description. Include only direct design and construction costs pertaining to roads, bridges and storm water; indirect and other administrative costs are not allowable. Attach extra pages as necessary.

Projects with descriptions:

- 1. Hauled \$87,225.84 of rock on un-paved roads.
- 2. Overlayed March Road and North Jefferson Street at a cost of \$142,750.18.
- 3. Had double yellow centerline applied to March Road and North Jefferson Street for \$828.16.
- 4. Hauled concrete millings and applied to shoulders along Jay Jay for \$7,587.60.

ROAD & BRIDGE ANNUAL SUMMARY REPORT

For use by all Entities (Application, Formula and Centralia Special Road District) to provide annual information in accordance with the Cooperative Agreement entered into with Boone County, Missouri (Commission Orders 459-2011 through 471-2011 approved on November 15, 2011, by the Boone County Commission).

Reporting Entity: City of
Columbia
Reporting on Calendar Year: 2019
Narrative for use of funds received The City of Columbia will be using the funds for the FY20 construction of Nifong: Providence to Forum 4 lane widening project and maintenance to Walnut: College to Old 63.
Narrative on overall condition of roads and bridges within reporting municipality:
The City of Columbia maintains 1389.9 lane miles of streets and 44 bridges/structures that span a
minimum of 20 feet. The City's street network is currently inspected on a 3 cycle, which means 1/3 of the
streets within the City are inspected every year using the PASER rating system. The City's current overall
average PASER rating is a 6.70. The City's 44 bridges and structures are inspected by MoDOT and City
staff every 2 years. Of the 44 structures, 38 were rated as Not Deficient, 2 were functionally deficient, and
4 were structurally deficient.
- Holo or dotal any consistent
Allocation and Expenditure of Funds Received listed by project, with a project description. Include only direct design and construction costs pertaining to roads, bridges and storm water; indirect and other administrative costs are not allowable. Attach extra pages as necessary.
Projects with descriptions _There were no allocation or expenditure of funds in FY19. We will be using the
funds for the FY20 Nifong: Providence to Forum 4 lane widening project and doing maintnenace on
Walnut: College to Old 63. This will be presented in the FY20
report.

City of Hallsville 2019 Annual Report

ROAD & BRIDGE ANNUAL SUMMARY REPORT

For use by all Entities (Application, Formula and Centralia Special Road District) to provide annual information in accordance with the Cooperative Agreement entered into with Boone County, Missouri (Commission Orders 459-2011 through 471-2011 approved on November 15, 2011, by the Boone County Commission).

Reporting Entity: City of Hallsville

Reporting on Calendar Year: July 1, 2018 - June 30, 2019

Narrative for use of funds received
The Road and Bridge Grant funding was used for the 2nd and last lease to purchase payment for the 2017 F550 Dump Truck & snow

plow, sidewalk repair on North Street, sidewalk repair on Ricketts Road, sidewalk repair at the 4-way intersection, and gravel added to the road to the sewer lagoon.

Narrative on overall condition of roads and bridges within reporting municipality:

The asphalt streets are in good condition. The concrete streets in Meadows Ledg are in poor condition. RFP's

were sent out and the funds received in November 2019 will not cover the cost. Future grants will be held back

until work on those streets can be completed.

Allocation and Expenditure of Funds Received listed by project, with a project description. Include only direct design and construction costs pertaining to roads, bridges and storm water; indirect and other administrative costs are not allowable. Attach extra pages as necessary.

Projects with descriptions
Carry over from fiscal year 2017/2018 was \$5,280.82 with an additional \$44,525.08 grant funding received in 2018
$Projects \ funded \ from \ the \ grant \ for \ the \ fiscal \ year \ 2018/2019 \ included \ \$545.00 \ on \ repair \ to \ the \ sidewalk \ on \ North$
Street, \$1,487.50 on repair to the sidewalk on Ricketts Road, and \$538.65 on repair to the sidewalk at the 4-way
intersection of Route B and Hwy 124 North. During the fiscal year \$3,629.92 worth of gravel was added to the
road that goes out to the sewer lagoon. After the second (and last) lease to purchase payment was made on the
2017 F550 Dump Truck & snow plow for \$38,632.67, the Road and Bridge Grant Fund was left with a balance of
\$4,972.16.
